Stimulating Simulations for the VIC C. William Engel, 1983-01-01 Computer Games Blair Carter, 2002 Lists the most significant writings on computer games including works that cover recent advances in gaming and the substantial academic research that goes into devising and improving computer games *Simulations of Decision-Making as Active Learning Tools* Peter Bursens, Vincent Donche, David Gijbels, Pieter Spooren, 2018-03-05 This volume brings together both political and educational scientists While educational research literature has so far not systematically addressed the tool of simulations of decision making political scientists have hardly used insights from research on assessment or on motivation and interest of students Almost all political science publications on simulations merely discuss how to implement the tool in class and fall short of providing evidence of the effects on student outcomes such as increased interest and performance Combining the two disciplines is mutually enriching Political science benefits from state of the art educational science measuring and testing of the claims made by the proponents of simulations while educational sciences adds the systematic analysis of simulations of decision making to their list of empirical objects which also adds insights to the theories on the affective component of student learning It is the explicit aim of the volume to address how simulating decision making environments fosters learning Implications for research and practice regarding student learning are addressed in all chapters **Computer Decisions**, 1983 **Electronic Design's Gold Book**, 1983 The Reader's Guide to Microcomputer Books Michael Nicita, Ronald Petrusha, 1984 *Personal Computing*, 1983 **Handbook of Computable General Equilibrium Modeling** Peter B.
