**Outrageous Idea of Christian Teaching** Perry Glanzer, Nathan Alleman, 2019-07-29 Hundreds of thousands of professors claim Christian as their primary identity and teaching as their primary vocational responsibility Yet in the contemporary university the intersection of these two identities often is a source of fear misunderstanding and moral confusion How does being a Christian change one's teaching Indeed should it Inspired by George Marsden's 1997 book *The Outrageous Idea of Christian Scholarship* this book draws on a survey of more than 2 300 Christian professors from 48 different institutions in North America to reveal a wide range of thinking about faith informed teaching Placing these empirical findings alongside the wider scholarly conversation about the role of identity informed teaching Perry L Glanzer and Nathan F Alleman argue that their Christian identity can and should inform professors teaching in the contemporary pluralistic university The authors provide a nuanced alternative to those who advocate for restraining the influence of one's extra professional identity and those who in the name of authenticity promote the full integration of one's primary identity into the classroom The book charts new ground regarding how professors think about Christian teaching specifically as well as how they should approach identity informed teaching more generally Teaching with the Brain in Mind Eric Jensen, 2005-06-15 A revised and updated edition of Jensen's best selling guide to applying brain research in classroom practice Mind Expanding: Teaching For Thinking And Creativity In Primary Education Wegerif, Rupert, 2010-08-01 There is considerable interest in education around the world in flexible thinking and learning skills but very little consensus as to the nature of these skills and how best to promote them in schools This book puts forward a clear and practical framework for understanding thinking creativity and learning to learn as the fruits of engagement in dialogue It also outlines in detail how this framework can be applied to teaching across the curriculum at both primary and secondary level drawing on the best practices associated with the teaching thinking creativity and learning to learn movements explaining their success in terms of dialogic theory In particular the book incorporates aspects of a number of thinking skills approaches such as Lipman's Philosophy for Children approach as well as features of contemporary innovations in education such as assessment for learning and the development of creativity Each chapter opens with a vignette to set the scene and continue into a light and popularly written exposition of theory before moving on to a description of practice and concluding with practical guidelines for how to teach for thinking and creativity in schools and classrooms The first six chapters in the book have more of a focus on developing core theoretical themes and the following six chapters in the second half of the book focus more on practice led themes The relationship between theory and practice is treated as flexible and dynamic theory being developed by practice as much as practice implementing theory **Teacher Thinking Twenty Years on** Pam M.
