## **Textile Yarns:**

Technical Textile Yarns R Alagirusamy, Apurba Das, 2010-06-30 Technical yarns are produced for the manufacture of technical textiles. As the range of technical textiles is rapidly increasing, an understanding of the range of yarns available and their properties is important in order to be able to meet the requirements of the intended end use. Part one of the book begins by reviewing the advances in yarn production. Topics examine the advances in textile yarn spinning, modification of textile yarn structures, yarn hairiness and its reduction, and coatings for technical textile yarns. The second group of chapters describes the range of technical yarns such as electro-conductive textile yarns, novel yarns, and plasma-treated yarns for biomedical applications. Technical sewing threads and biodegradable textile yarns are also discussed. Technical textile yarns provides essential reading for yarn and fabric manufacturers, textile scientists, technicians, engineers, and technologists covering a wide range of areas within textile applications. This book will also be an important information source for academics and students. Provides a comprehensive overview of the variety of technical textile yarns available along with individual characteristics and production methods. Documents advances in textile yarn spinning and texturing featuring compact rotor and friction spinning. Assesses different types of technical yarns including plasma-treated yarns for biomedical applications and hybrid yarns for thermoplastic composites. Textile Yarns Bhuvanesh Chandra Goswami, J. G.

**Value Added Textile Yarns-Manufacturing Techniques and its uses** Dr. S. S. Bhattacharya, 2020 Value added textile yarns means a thread increases its value from the conventional ones with respect to price and aesthetic and functional properties or all at a time. These may be the changes of either bulk colour using different raw materials, any changes of technical parameters periodically or randomly etc along the length of the yarns. Value added also refers to the worth added to a product during production process means the difference between the selling price and the cost of production is more from the normal product. The more the difference, more will be the value added. The global market of Value added Textile Yarns and its products is leaping forward as the conscious of the mankind is gradually increasing. The textile products are lighter, stronger, less effective by the environment, are getting popularity in each field of engineering. The book deals from the basic value added yarns like doubled or folded yarns to the modern concept of novelty yarns in different fields like fancy yarns, conductive yarns, medical yarns etc. The book is also discussed the production of bottle flake yarns. Manufacturing technology including modern and conventional is also described in short here but the most important and necessary material are incorporated. Mathematical Calculation, important technical parameters etc are also mentioned. We do hope that the book will satisfy the students, researchers, and also those who are in the industries. **Textile Industries**, 1980 Vols for include annually an issue with title Textile industries buyers guide.
