That Shining Band:

Women's Music for the Screen Felicity Wilcox, 2021-08-26 Women's Music for the Screen Diverse Narratives in Sound shines a long overdue light on the works and lives of female identifying screen composers. Bringing together composer profiles, exclusive interview excerpts and industry case studies, this volume showcases their achievements and reflects on the systemic gender biases women have faced in an industry that has long excluded them. Across 16 essays, an international array of contributors present a wealth of research data, biographical content and musical analysis of film, television and video game scores to understand how the industry excludes women, the consequences of these deficits and why such inequities persist and to document women's rich contributions to screen music in diverse styles and genres. The chapters amplify the voices of women composers including Bebe Barron, Delia Derbyshire, Wendy Carlos, Anne Dudley, Rachel Portman, Hildur Guðnadóttir, Mica Levi, Winifred Phillips and more. From the mid twentieth century to the present and from classic Hollywood scores to pioneering electronic music, these are the stories and achievements of the women who have managed to forge successful careers in a male dominated arena. Suitable for researchers, educators and students alike, *Women's Music for the Screen* urges the screen music industry to consider these sounds and stories in a way it hasn't before, as voices that more accurately reflect the world we all share.

A. I. Drew, Meredith C. Romig, 2013 As global warming and species migration become more prevalent issues, there is an urgent need for a text that provides comprehensive taxonomic details and geographic distributions of Dacinae fruit flies within south east Asia. In particular, some of the major pest species of this region are being introduced on a regular basis to new geographical areas, causing widespread food security issues and economic hardship. Quarantine and horticultural organizations require detailed information on these fruit fly species in order to detect and eradicate any new incursions. This major new reference work details the taxonomic research into the subfamily Dacinae which contains the tropical fruit flies of south east Asia as well as many other regions of the world. While focusing on

south east Asian fauna all known species are included through a study of the type material available in museums around the world Specimens collected in major surveys conducted across Asia from 1983 to present have also been used to ensure a complete in depth review of this subfamily Providing complete descriptions and artwork of all species of Dacinae recorded from the south east Asian region for the first time this book is written and illustrated by experts with over 80 years combined research experience Areas covered include India Bhutan Nepal Sri Lanka Myanmar China Taiwan Japan the Philippines Palau Vietnam Thailand Singapore Malaysia and Indonesia It is an essential reference for departments of agriculture researchers and students of entomology and quarantine horticultural and chemical industry personnel worldwide Key features 120 recently discovered species 500 detailed drawings Revision of all known species Updated geographical distributions and host records Accurate list and detailed information of all known pest species This book will be followed by Keys to Fruit Flies of South East Asia
