Statistical Typing Wanous, John A. Kushner, 1990 **Abstract Data Types** Nell Dale, Henry M. Walker, 1996 Since 1985 Nell Dale's texts have helped shape the way computer science is taught. Now she and Henry Walker, an accomplished instructor and author in his own right, are proposing a new focus for the junior/senior level data structures course. A timely response to the prevalence of object-oriented programming, this new text expands the focus of the advanced data structures course to examine not only the structure of a data object but also its type. This new focus gives students the opportunity to look at data objects from the point of view of both user and implementer. *Statistical Typing with Tabulation Problems* Wanous, Emeritus, Kushner, 1990-01-01 Statistical Typing Samuel James Wanous, 1945 *Publications of the American Statistical Association* American Statistical Association, 1897 A scientific and educational journal not only for professional statisticians but also for economists, business executives, research directors, government officials, university professors, and others who are seriously interested in the application of statistical methods to practical problems in the development of more useful methods and in the improvement of basic statistical data. **Statistical Report** California. Fabozzi, Francesco Fabozzi, 2022-09-06 The standard reference for fixed income portfolio managers, fully updated with new analytical frameworks. Fixed Income Mathematics is known around the world as the leading guide to understanding the concepts, valuation models for bonds with embedded options, mortgage-backed securities, asset-backed securities, and other fixed income instruments, and portfolio analytics. Fixed Income Mathematics begins with basic concepts of the mathematics of finance, then systematically builds on them to reveal state-of-the-art methodologies for evaluating them and managing fixed income portfolios. Concepts are illustrated with numerical examples and graphs, and you need only a basic knowledge of elementary algebra to understand them. This new edition includes several entirely new chapters: Risk-Adjusted Returns, Empirical Duration Analysis of Floating Rate Securities, Holdings-Based Return Attribution Analysis, Returns-Based Style Attribution Analysis, Measuring Bond Liquidity, and Machine Learning, and provides substantially revised chapters on Interest rate modeling, Probability theory, Optimization models and applications to bond portfolio management, Historical return measures, Measuring historical return volatility. The concepts and methodologies for managing fixed income portfolios have improved dramatically over the past 15 years. This edition explains these changes and provides the knowledge you need to value fixed income securities and measure the various types of risks associated with individual securities and portfolios. **Statistical Register for ... and Previous Years** Australia.
