Statistical Issues In Drug Development:

Statistical Issues in Drug Development Stephen S. Senn, 2008-02-28 Drug development is the process of finding and producing therapeutically useful pharmaceuticals turning them into safe and effective medicine and producing reliable information regarding the appropriate dosage and dosing intervals With regulatory authorities demanding increasingly higher standards in such developments statistics has become an intrinsic and critical element in the design and conduct of drug development programmes Statistical Issues in Drug Development presents an essential and thought provoking guide to the statistical issues and controversies involved in drug development This highly readable second edition has been updated to include Comprehensive coverage of the design and interpretation of clinical trials Expanded sections on missing data equivalence meta analysis and dose finding An examination of both Bayesian and frequentist methods A new chapter on pharmacogenomics and expanded coverage of pharmaco epidemiology and pharmaco economics Coverage of the ICH guidelines in particular ICH E9 Statistical Principles for Clinical Trials It is hoped that the book will stimulate dialogue between statisticians and life scientists working within the pharmaceutical industry The accessible and wide ranging coverage make it essential reading for both statisticians and non statisticians working in the pharmaceutical industry regulatory bodies and medical research institutes There is also much to benefit undergraduate and postgraduate students whose courses include a medical statistics component

Statistical Issues in Drug Research and Development Karl E. Peace, 2017-09-19 This book is a compilation of topics addressed by the ASA Biopharmaceutical Section work groups including the etiology and evolution of the work groups the work group guidelines and structure and the statistical issues associated with clinical trials in clinical drug development programs

Statistical Issues in Drug Development Stephen S Senn, 2021 This will be the third edition of Statistical Issues in Drug Development and will be fully revised and updated to include information on the latest industry standards and guidelines Both the first 1997 and second 2007 editions were very well received and the book has become a standard This book is unique in providing a thorough and critical discussion of the most important and controversial issues encountered by statisticians and their life scientist colleagues on both sides of the regulatory divide in drug development The primary purpose of the book is to encourage and facilitate discussion between statisticians and their colleagues of the many complex statistical issues that arise in drug development The book will be suitable as a course of self instruction for statisticians who are new to the pharmaceutical industry either because of recent graduation or change of career It will also act as an authoritative reference for those working in drug development and provide possible topics for discussion in journal forums

Statistical Issues in Drug Development Stephen Senn, 1997-10-20 Statistical Issues in Drug Development presents an essential and thought provoking guide to the statistical issues and controversies involved in drug development This second edition has been updated to include Comprehensive coverage of the design and interpretation of clinical trials Expanded sections on missing data equivalence meta analysis and dose finding An examination of both

Bayesian and frequentist methods A new chapter on pharmacogenomics and expanded coverage of pharmaco epidemiology and pharmaco economics Coverage of the ICH guidelines in particular ICH E9 Statistical Principles for Clinical Trials It is hoped that the book will stimulate dialogue between statisticians and life scientists working within the pharmaceutical industry The accessible and wide ranging coverage make it essential reading for both statisticians and non statisticians working in the pharmaceutical industry regulatory bodies and medical research institutes There is also much to benefit undergraduate and postgraduate students whose courses include a medical statistics component BOOK JACKET

Interface between Regulation and Statistics in Drug Development Demissie Alemayehu, Birol Emir, Michael Gaffney, 2020-11-11 With the critical role of statistics in the design conduct analysis and reporting of clinical trials or observational studies intended for regulatory purposes numerous guidelines have been issued by regulatory authorities around the world focusing on statistical issues related to drug development However the available literature on this important topic is sporadic and often not readily accessible to drug developers or regulatory personnel This book provides a systematic exposition of the interplay between the two disciplines including emerging themes pertaining to the acceleration of the development of pharmaceutical medicines to serve patients with unmet needs Features Regulatory and statistical interactions throughout the drug development continuum The critical role of the statistician in relation to the changing regulatory and healthcare landscapes Statistical issues that commonly arise in the course of drug development and regulatory interactions Trending topics in drug development with emphasis on current regulatory thinking and the associated challenges and opportunities The book is designed to be accessible to readers with an intermediate knowledge of statistics and can be a useful resource to statisticians medical researchers and regulatory personnel in drug development as well as graduate students in the health sciences The authors decades of experience in the pharmaceutical industry and academia and extensive regulatory experience comes through in the many examples throughout the book **Statistical issues in pharmaceutical industry** Gary G.
