Steam Over Macedonia 1870-1912:

Steam Over Macedonia, 1870-1912 Vasilēs K. Gounarēs, 1993 Steam over Macedonia uses railway construction and operation as a means of understanding the process of commercialization and modernization that took place during the years of the Ottoman Empire's decay **Steam Over Macedonia, 1870-1912** Vasilēs K. Gounarēs, 1993 Steam over Macedonia uses railway construction and operation as a means of understanding the process of commercialization and modernization that took place during the years of the Ottoman Empire's decay Imagining Macedonia in the Age of Empire Denis Ljuljanović, 2023-08-15 During the tumultuous age of empire Ottoman Macedonia became a blank canvas onto which Great Powers and neighboring states projected their aspirations, grievances, ambitions, and state-building endeavors. This manuscript aims to elucidate these constructs and imaginaries employing a theoretical framework encompassing entangled history, post-colonial theory, and subaltern studies. It will examine both inter-state and local examples to shed light on the multifaceted nature of this complex issue Lakes and Empires in Macedonian History James Pettifer, Miranda

Vickers, 2021-08-26 A transnational and environmental history of Macedonia from prehistory to the 21st century Eastern European Railways in Transition Henry Jacolin, 2016-04-29 During the nineteenth century, railway lines spread rapidly across Europe, linking the continent in ways unimaginable to previous generations. By the beginning of the twentieth century, the great cities of the continent were linked by a complex and extensive rail network. Yet this high point of interconnectivity was abruptly cut off after 1945 as the Cold War built barriers both physical and ideological between east and west. In this volume, leading transport history scholars take a fresh look at this situation and the ramifications it had for Europe. As well as addressing the parallel development of railways either side of the Iron Curtain, the book looks at how transport links have been reconnected and reconfigured in the twenty years since the reunification of Europe. In particular, it focuses upon the former communist countries and how they have responded to the challenges and opportunities railways offer both nationally and internationally. Including contributions from historians, researchers, policy makers, representatives of railway companies, and railway museum staff, the essays in this collection touch upon a rich range of subjects. Divided into four sections, The Historical Overview, Under Russian Protection, After the Fall of the Iron Curtain, and The Heritage of Railways in Eastern Europe, the volume offers a broadly chronological introduction to the issue that provides both a snap shot of current debates and a starting point for further research. It concludes that in an era of increased globalisation and interconnectivity, and despite the rise of air and road transport and virtual methods of communication, railways still have a crucial role to play in the development of a prosperous and connected Europe **Greece in the Balkans** Othon Anastasakis, Dimitar Bechev, Nicholas Vrousalis, 2020-07-13 This volume brings together young researchers in an interdisciplinary study of Greek interaction with other Balkan states over the past two hundred years. The thirteen chapters of the volume reflect the diversity of a long and complex relationship between Greece and its Balkan neighbours. They thus shed refreshing light on its
