Ingenuity Gap How Can We Solve The Problems Of The Future:

The Ingenuity Gap Thomas Homer-Dixon,2011-04-30 Is our world becoming too complex and too fast paced to manage The challenges facing human societies from international financial crises and global climate change to pandemics of tuberculosis and AIDS converge intertwine and often remain largely beyond our ken Most of us suspect that the experts don t really know what s going on and that as a species we have released forces that are neither managed nor manageable This is the ingenuity gap the term coined by Thomas Homer Dixon the critical gap between our need for practical and innovative ideas to solve complex problems and our actual supply of those ideas Homer Dixon shows us how in our complex world while poor countries are particularly vulnerable to ingenuity gaps our own rich countries are no longer immune When the gap widens political disintegration and violent upheaval can result reaching into our own economies and daily lives in subtle unforeseen ways

Global Issues and Change

Boyd Johnson (Ph. D.), John S Johnson (Ph. D.), 2004 Confronting New Realities Juma Volter Mwapachu, 2005 In 1986 Tanzania agreed with the IMF and the World Bank to pursue robust social and economic reforms in light of the serious decline in the performance of the economy with the objective of achieving sustainable economic growth At a political level a multi party system was introduced and the first multi party elections held since 1962 took place in 1995 and again in 2005 This book examines in considerable depth the political and economic changes that have taken place in this period of reform It highlights both the achievements and the challenges that remain particularly those brought about by new and dynamic phase of globalisation in areas such as trade and investment The author articulates perspectives on the democratisation and governance trajectories the country should pursue to attain a more prosperous economic status whilst sustaining the unity peace and diversity that have characterised the country since independence

An Illustrated Short History of Progress Ronald Wright, 2006 In these acclaimed CBC Massey Lectures Ronald Wright argues that each time history repeats itself the price goes up The twentieth century was a time of runaway growth in human population consumption and technology placing a colossal load on all natural systems He demonstrates how our modern predicament is as old as civilization a 10 000 year experiment we have participated in but seldom controlled Only by understanding the patterns of human triumph and disaster can we recognize the experiment's inherent dangers and shape its outcome Wright's provocative text evokes striking images across time and space starting with Paul Gauguin's painting *D O Venons Nous Que Sommes Nous O Allons Nous* Where do we come from What are we Where are we going three questions that perfectly summarize the focus of his lectures In this new edition illuminating illustrations and sidebars complement Wright's arguments and allow readers to witness further evidence supporting his cautionary tale pub desc *Long range planning* Strategic Planning Society, European Planning Federation, 2002 *World Affairs Journal*, 2000 **Digital Bridges** John Senyo C.
