## The Origins Of Capitalism:

**The Origin of Capitalism** Ellen Meiksins Wood,1999-03-01 Few questions of history have as many contemporary political implications as this deceptively simple one how did capitalism come to be In this clarifying work Ellen Meiksins Wood refutes most existing accounts of the origin of capitalism which she argues fail to recognize capitalism's distinctive attributes as a social system making it seem a culmination of a natural human inclination to sell and buy Wood begins with searching assessments of classical thinkers ranging from Adam Smith to Max Weber She then explores the great Marxist debates among writers such as Paul Sweezy Maurice Dobb Robert Brenner Perry Anderson and E P Thompson She concludes with her own account of capitalism's agrarian origin challenging the association of capitalism with cities the identification of capitalist with bourgeois and conceptions of modernity and postmodernity derived from those assumptions Only with a proper understanding of capitalism's beginning Wood concludes can we imagine the possibility of its ending *Case Studies in the Origins of Capitalism* Xavier Lafrance,Charles Post,2018-09-19 This edited volume builds and expands on the groundbreaking work of Robert Brenner and Ellen Meiksins Wood on the origins of capitalism Whereas Brenner and Wood focused mostly on the emergence of capitalism in the English countryside agrarian capitalism this book utilizes their approach to offer original theoretically sophisticated and empirically informed accounts of transitions to capitalism both agrarian and industrial in a wide range of countries in order to provide within a single volume a diverse collection of relatively brief yet detailed case studies of the historical transition to capitalism distributed across three continents Offering a new and highly original analysis of the global spread of capitalism this book will be a unique contribution to the longstanding debate on the transition to capitalism

Luciano Pellicani, 1994 The Origins of Capitalism As a Social System John Milius, 2019-12-06 Economists historians and

answers imply different conceptualizations of what capitalism actually is This book provides a simultaneous inquiry into the

origins of capitalism as well as provides a theoretical treatise on capitalism The Origins of Capitalism as a Social System

explores the line between what is and is not capitalism re producing a theory of capitalism as a system of class domination

and exploitation Part I of the book focuses on the monetary theory of value and capital developed by Karl Marx while at the

same time critically reviews an array of economic and historical literature both Marxist and non Marxist Following this Part

II expounds the first emergence of capitalism in Venice It highlights the historical contingencies that made capitalism in the

Venetian society possible as well as the structural elements of the capitalist system and their interconnectedness Finally Part

III discusses the capitalist character of the Venetian social formation from the end of the fourteenth century until the fall of

the republic to Napoleon in 1797 As part of this the author investigates the significance of forms of governmentality beyond

national cohesion and territorialization Of great interest to economists historians and both undergraduate and postgraduate

**International Review of Social History** ,1996 **Anti-Capitalism** Alfredo Saad-Filho,2003 An ideal introduction for all activists to the most pressing problems of our times

The History of Capitalism in Mexico Enrique Semo,1993 What lies at the center of the Mexican colonial experience Should Mexican colonial society be construed as a theoretical monolith capitalist from its inception or was it essentially feudal as traditional historiography viewed it In this pathfinding study Enrique Semo offers a fresh vision that the conflicting social formations of capitalism feudalism and tributary despotism provided the basic dynamic of Mexico's social and economic development Responding to questions raised by contemporary Mexican society Semo sees the origin of both backwardness and development not in climate race or a heterogeneous set of unrelated traits but rather in the historical interaction of each social formation In his analysis Mexico's history is conceived as a succession of socioeconomic formations each growing within the womb of its predecessor Semo sees the task of economic history to analyze each of these formations and to construct models that will help us understand the laws of its evolution His premise is that economic history contributes to our understanding of the present not by formulating universal laws but by studying the laws of development and progression of concrete economic systems The History of Capitalism in Mexico opens with the Conquest and concludes with the onset of the profound socioeconomic transformation of the last fifty years of the colony a period clearly representing the precapitalist phase of Mexican development In the course of his discussion Semo addresses the role of dependency an important theoretical innovation and introduces the concept of tributary despotism relating it to the problems of Indian society and economy He also provides a novel examination of the changing role of the church throughout Mexican colonial history The result is a comprehensive picture which offers a provocative alternative to the increasingly detailed and monographic approach that currently dominates the writing of history Originally published as Historia del capitalismo en Mexico in 1973 this classic work is now available for the first time in English It will be of interest to specialists in Mexican colonial history as well as to general readers

**Early Islam and the Birth of Capitalism** Benedikt Koehler,2014-06-17 Early Islam and the Birth of Capitalism proposes a strikingly original thesis that capitalism first emerged in Arabia not in late medieval Italian city states as is commonly assumed Early Islam made a seminal but largely unrecognized contribution to the history of economic thought it is the only religion founded by an entrepreneur Descending from an elite dynasty of religious civil and commercial leaders Muhammad was a successful businessman before founding Islam As such the new religion had

much to say on trade consumer protection business ethics and property As Islam rapidly spread across the region so did the economic teachings of early Islam which eventually made their way to Europe Early Islam and the Birth of Capitalism demonstrates how Islamic institutions and business practices were adopted and adapted in Venice and Genoa These financial innovations include the invention of the corporation business management techniques commercial arithmetic and monetary reform There were other Islamic institutions assimilated in Europe charities the waqf inspired trusts and institutions of higher learning the madrasas were models for the oldest colleges of Oxford and Cambridge As such it can be rightfully said that these essential aspects of capitalist thought all have Islamic roots
