## **The Other Landscape:**

Routledge Handbook of Landscape Character Assessment Graham Fairclough, Ingrid Sarlöv Herlin, Carys Swanwick, 2018-05-11 In this multi authored book senior practitioners and researchers offer an international overview of landscape character approaches for those working in research policy and practice relating to landscape. Over the last three decades European practice in landscape has moved from a narrow if relatively straightforward focus on natural beauty or scenery to a much broader concept of landscape character constructed through human perception and transcending any of its individual elements. Methods tools and techniques have been developed to give practical meaning to this idea of landscape character. The two main methods Landscape Character Assessment LCA and Historic Landscape Characterisation HLC were applied first in the United Kingdom but other methods are in use elsewhere in Europe and beyond to achieve similar ends. This book explores why different approaches exist the extent to which disciplinary or cultural specificities in different countries affect approaches to land management and landscape planning and highlights areas for reciprocal learning and knowledge transfer. Contributors to the book focus on examples of European countries such as Sweden Turkey and Portugal that have adopted and extended UK style landscape characterisation but also on countries with their own distinctive approaches that have developed from different conceptual roots as in Germany France and the Netherlands. The collection is completed by chapters looking at landscape approaches based on non European concepts of landscape in North America Australia and New Zealand. This book has an introductory price of 125 205 which will last until 3 months after publication after this time it will revert to 140 225

Ioannis N. Vogiatzakis, Theano S. Terkenli, Maria Gabriella Trovato, Nizar Abu-Jaber, 2020-05-15 Landscapes have long been viewed as multifunctional integrating ecological economic sociocultural historical and aesthetic dimensions Landscape science and public awareness in Europe have been progressing in leaps and bounds The challenges involved in landscape related issues and fields however are multiple and refer to landscape stewardship and protection as well as to the development of comprehensive theoretical and methodological approaches in tandem with public sensitization and participatory governance and in coordination with appropriate top down planning and policy instruments Landscape scale approaches are fundamental to the understanding of past and present cultural evolution and are now considered to be an

appropriate spatial framework for the analysis of sustainability Methods and tools of landscape analysis and intervention have also gone a long way since their early development in Europe and the United States Although significant progress has been made there remain many issues which are understudied or not investigated at all at least in a Mediterranean context This Special Issue addresses the application of landscape theory and practice in the Eastern Mediterranean and mainly but not exclusively reports on the outcomes of an international conference held in Jordan in December 2015 with the title Landscapes of Eastern Mediterranean Challenges Opportunities Prospects and Accomplishments The focus of this Special Issue landscapes of the Eastern Mediterranean region thus constitutes a timely area of research interest not only because these landscapes have so far been understudied but also as a rich site of strikingly variegated long standing multicultural human environmental interactions These interactions resting on and taking shape through millennia of continuity in tradition have been striving to adapt to technological advances while currently juggling with manifold and multilayered socioeconomic and climate environmental crises
