The Origin of Civilisation and the Primitive Condition of Man Sir John Lubbock, 1889 **Conflicting Models for the Origin of Life** Stoyan K. Smoukov, Joseph Seckbach, Richard Gordon, 2023-03-14

Conflicting Models for the Origin of Life provides a forum to compare and contrast the many hypotheses that have been put forward to explain the origin of life. There is a revolution brewing in the field of Origin of Life in the process of trying to figure out how Life started; many researchers believe there is an impending second creation of life, not necessarily biological. Up to date understanding is needed to prepare us for the technological and societal changes it would bring. Schrodinger's 1944 'What is life?' included the insight of an information carrier which inspired the discovery of the structure of DNA. In 'Conflicting Models of the Origin of Life' a selection of the world's experts are brought together to cover different aspects of the research from progress towards synthetic life, artificial cells and sub-cellular components to new definitions of life and the unexpected places life could have emerged. Chapters also cover fundamental questions of how memory could emerge from memoryless processes and how we can tell if a molecule may have emerged from life. Similarly, cutting edge research discusses plausible reactions for the emergence of life both on Earth and on exoplanets. Additional perspectives from geologists, philosophers and even roboticists thinking about the origin of life round out this volume. The text is a state of the art snapshot of the latest developments on the emergence of life to be used both in graduate classes and by citizen scientists. Audience: Researchers in any area of astrobiology as well as others interested in the origins of life will find a modern and current review of the field and the current debates and obstacles. This book will clearly illustrate the current state of the art and engage the imagination and creativity of experts across many disciplines.

The Author's work reflects researching the intricacies of the English language. The section about spelling reinforces the point that learning to spell words is a matter of memorization given the immense number of exceptions to every rule of spelling. One cannot simply spell a word by using the letters that one hears when saying the word. English is an exceptionally difficult language both to learn and to teach as clearly pointed out in both 'No Stinkin Grammar I' and the current volume. I urge English teachers to read these books not only for further knowledge of the English language but also to remind themselves that the teaching of English grammar, writing and spelling is a monumental and essential task. 'No Stinkin Grammar II' delves deeply into the intricacies of the English language. The Author's insight is presented in an easy to read, sometimes humorous approach. He presents information from the viewpoint of a writer who is challenged by the stinkin grammar of the exceptional English language.
