*The One-Straw Revolution* Masanobu Fukuoka, 2010-09-08 Call it Zen and the Art of Farming or a Little Green Book Masanobu Fukuoka's manifesto about farming eating and the limits of human knowledge presents a radical challenge to the global systems we rely on for our food At the same time it is a spiritual memoir of a man whose innovative system of cultivating the earth reflects a deep faith in the wholeness and balance of the natural world As Wendell Berry writes in his preface the book is valuable to us because it is at once practical and philosophical It is an inspiring necessary book about agriculture because it is not just about agriculture Trained as a scientist Fukuoka rejected both modern agribusiness and centuries of agricultural practice deciding instead that the best forms of cultivation mirror nature's own laws Over the next three decades he perfected his so called do nothing technique commonsense sustainable practices that all but eliminate the use of pesticides fertilizer tillage and perhaps most significantly wasteful effort Whether you're a guerrilla gardener or a kitchen gardener dedicated to slow food or simply looking to live a healthier life you will find something here you may even be moved to start a revolution of your own

*One-Straw Revolutionary* Larry Korn, 2015 One Straw Revolutionary is the first book to offer an intimate look at the philosophy and work of one of natural farming's most influential practitioners Japanese farmer and philosopher Masanobu Fukuoka This offers readers a rare insight into natural farming and what Mr Fukuoka was like as a person It explains how simple farming naturally actually is and why it offers our only real hope for reestablishing a wholesome relationship with the earth **Sowing Seeds in the Desert** Masanobu Fukuoka, 2012 Argues that the Earth's deteriorating condition is man made and outlines a way for the process to be reversed by rehabilitating the deserts using natural farming *One-Straw*

*Revolutionary* Larry Korn, 2015-08-21 *One Straw Revolutionary* represents the first commentary on the work of the late Japanese farmer and philosopher Masanobu Fukuoka 1913-2008 widely considered to be natural farming's most influential practitioner Mr Fukuoka is perhaps most known for his bestselling book *The One Straw Revolution* 1978 a manifesto on the importance of no till agriculture which was at the time of publication a radical challenge to the global systems that supply the world's food and still inspires readers today Larry Korn who apprenticed with Mr Fukuoka in Japan at the time translated the manuscript and brought it to the United States knowing it would change the conversation about food forever *The One Straw Revolution* edited by Korn and Wendell Berry was an immediate international success and established Mr Fukuoka as a leading voice in the fight against conventional industrial agriculture In this new book through his own personal narrative Larry Korn distills his experience of more than thirty five years of study with Mr Fukuoka living and working on his farm on Shikoku Island and traveling with Mr Fukuoka to the United States on two six week visits *One Straw Revolutionary* is the first book to look deeply at natural farming and intimately discuss the philosophy and work of Mr Fukuoka In addition to giving his personal thoughts about natural farming Korn broadens the discussion by pointing out natural farming's kinship with the ways of indigenous cultures and traditional Japanese farming At the same time he clearly distinguishes natural farming from other forms of agriculture including scientific and organic agriculture and permaculture Korn also clarifies commonly held misconceptions about natural farming in ways Western readers can readily understand And he explains how natural farming can be used practically in areas other than agriculture including personal growth and development The book follows the author on his travels from one back to the land commune to another in the countryside of 1970s Japan a journey that eventually led him to Mr Fukuoka's natural farm Korn's description of his time there as well as traveling with Mr Fukuoka during his visits to the United States offers a rare inside look at Mr Fukuoka's life Readers will delight in this personal insight into one of the world's leading agricultural thinkers A profound sharing of the essential philosophy of natural farming translated through the friendship between Larry Korn and Masanobu Fukuoka It offers wise insights into authentic practices that honor the community of all life Katrina Blair author of *The Wild Wisdom of Weeds*

*The Global Sustainability Challenge* Gerard Magill, James Benedict, 2020-04-14 This collection of essays is based on presentations given at the 4th conference in an annual endowed series held at Duquesne University USA It addresses emerging concerns and pivotal problems about our planet's environment and ecology The contributions gathered here highlight the inter relation of topics and expertise regarding science and philosophy ethics religion global issues and generational perspectives The book concludes with an ethical analysis of the multiple and overlapping challenges that require urgent attention and long term resolution It will appeal to scholars and students in a variety

of disciplines and fields that deal with the earth's survival and flourishing      Sowing Seeds in the Desert Masanobu Fukuoka, 2012-05-28 This is what all of humanity has to learn to do whether it is in economic desert created by Wall Street or an ecological desert created by globalized corporate agriculture Vandana Shiva founder of Navdanya Research Foundation for Science Technology Ecology The earth is in great peril due to the corporatization of agriculture the rising climate crisis and the ever increasing levels of global poverty starvation and desertification on a massive scale This present condition of global trauma is not natural but a result of humanity's destructive actions And according to Masanobu Fukuoka it is reversible We need to change not only our methods of earth stewardship but also the very way we think about the relationship between human beings and nature Fukuoka grew up on a farm on the island of Shikoku in Japan As a young man he worked as a customs inspector for plants going into and out of the country This was in the 1930s when science seemed poised to create a new world of abundance and leisure when people fully believed they could improve upon nature by applying scientific methods and thereby reap untold rewards While working there Fukuoka had an insight that changed his life forever He returned to his home village and applied this insight to developing a revolutionary new way of farming that he believed would be of great benefit to society This method which he called natural farming involved working with not in opposition to nature Fukuoka's inspiring and internationally best selling book *The One Straw Revolution* was first published in English in 1978 In this book Fukuoka described his philosophy of natural farming and why he came to farm the way he did *One Straw* was a huge success in the West and spoke directly to the growing movement of organic farmers and activists seeking a new way of life For years after its publication Fukuoka traveled around the world spreading his teachings and developing a devoted following of farmers seeking to get closer to the truth of nature *Sowing Seeds in the Desert* a summation of those years of travel and research is Fukuoka's last major work and perhaps his most important Fukuoka spent years working with people and organizations in Africa India Southeast Asia Europe and the United States to prove that you could indeed grow food and regenerate forests with very little irrigation in the most desolate of places Only by greening the desert he said would the world ever achieve true food security This revolutionary book presents Fukuoka's plan to rehabilitate the deserts of the world using natural farming including practical solutions for feeding a growing human population rehabilitating damaged landscapes reversing the spread of desertification and providing a deep understanding of the relationship between human beings and nature Fukuoka's message comes right at the time when people around the world seem to have lost their frame of reference and offers us a way forward *Sowing Seeds in the Desert* will persuade any reader that the imperiled living world is our greatest teacher and inspire them to care for it as vigorously as Fukuoka has Toby Hemenway author of *Gaia's Garden*      *A Green and Permanent Land* Randal S. Beeman, James A. Pritchard, 2001 Once patronized primarily by the counterculture and the health food establishment the organic food industry today is a multi billion dollar business driven by ever growing consumer demand for safe food and greater public awareness of ecological

issues Assumed by many to be a recent phenomenon that industry owes much to agricultural innovations that go back to the Dust Bowl era This book explores the roots and branches of alternative agricultural ideas in twentieth century America showing how ecological thought has challenged and changed agricultural theory practice and policy from the 1930s to the present It introduces us to the people and institutions who forged alternatives to industrialized agriculture through a deep concern for the enduring fertility of the soil a passionate commitment to human health and a strong advocacy of economic justice for farmers Randal Beeman and James Pritchard show that agricultural issues were central to the rise of the environmental movement in the United States As family farms failed during the Depression a new kind of agriculture was championed based on the holistic approach taught by the emerging science of ecology Ecology influenced the permanent agriculture movement that advocated such radical concepts as long term land use planning comprehensive soil conservation and organic farming Then in the 1970s sustainable agriculture combined many of these ideas with new concerns about misguided technology and an over consumptive culture to preach a more sensible approach to farming In chronicling the overlooked history of alternative agriculture A Green and Permanent Land records the significant contributions of individuals like Rex Tugwell Hugh Bennett Louis Bromfield Edward Faulkner Russell and Kate Lord Scott and Helen Nearing Robert Rodale Wes Jackson and groups like Friends of the Land and the Practical Farmers of Iowa And by demonstrating how agriculture also remains central to the public interest especially in the face of climatic crises genetically altered crops and questionable uses of pesticides this book puts these issues in historical perspective and offers readers considerable food for thought
