Prof Dr Barrie Needham

Land Use Planning:

Dutch Land-use Planning Prof Dr Barrie Needham, 2014-03-28 Dutch planning is widely known and admired for its ambitions and its achievements This book provides for the first time a comprehensive description and analysis in English of its full range of policies and practices It gives an up to date account of the principles written and unwritten behind the planning and in addition shows how the practice sometimes ignores those principles in order to achieve better results It describes the content of the policies the measures taken to realise them and the successes and failures The book is not uncritical of Dutch land use planning but the author values its strengths and believes that planning in other countries could learn from them These strengths arise in the continuing tension between the high ambitions of the Dutch planning and the ingenuity and pragmatism exercised in order to realise those ambitions Strategic Environmental Assessment in Transport and Land Use Planning Thomas B. Fischer, 2023-04-28 Assessing the full scale of environmental impacts is essential for effective planning of transport and land use This is an analysis of transport and land use planning using strategic environmental assessment SEA It establishes the effectiveness of SEA through comparative studies of practice in three countries Britain the Netherlands and Germany The author shows that use of SEA is widespread but far from systematic He demonstrates the advantages of adopting a systematic application of a comprehensive form of SEA derived from all the major current approaches Only once this approach is fully understood and systematically applied will all the full benefits be achieved and environmental impacts be minimized *Mapping and Forecasting Land Use* Paulo Pereira, Eduardo Gomes, Jorge Rocha, 2022-08-18 Mapping and Forecasting Land Use The Present and Future of Planning is a comprehensive reference on the use of technologies to map land use focusing on GIS and remote sensing applications and methodologies for land use monitoring This book addresses transversal topics such as urbanisation biodiversity loss climate change ecosystem services and participatory planning with the pros and cons of various aerial technologies in mapping and land use It follows a multidisciplinary approach and provides opinions and evidence from leading researchers working in academic institutions across the globe The book s second half moves from theory and research advancement into case studies compiling global examples to provide real world context and evidence of the techniques and applications Mapping and Forecasting Land Use is a valuable guide for graduates academics and researchers in the fields of geography geographic information science and land use science who want to effectively apply GIS and remote sensing capabilities to mapping or wider land studies Researchers in geosciences environmental science and agriculture will also find this of value in utilising 21st century technologies in their field Provides a guide to land use mapping technologies including GIS and remote sensing Covers a wide field of interdisciplinary subjects related to GIS applications in land use Features global case studies alongside exploring theory and current research in the field Dutch Land Use Planning Barrie Needham, 2007 Nederland is een van de drukst bevolkte gebieden op de aarde We staan bekend om ons vermogen om ruimte te scheppen en hoe we met deze

ruimte omgaan Maar de ruimte blijft beperkt Hoe kunnen we deze ruimte het beste benutten Het Engelstalige boek Dutch Land Use Planning omschrijft de Nederlandse ruimtelijke planning en ordening en gaat hier dieper op in Het geeft een volledig beeld van Ruimtelijke Ordening in Nederland Het boek behandelt naast formele structuren en regels ook informele en dagelijkse praktijk en bevat verfrissende inzichten in Ruimtelijke Ordening in Nederland Er is veel aandacht voor de wrijvingen tussen de planologische instanties het handelen met grond en geld de achterliggende principes en de spanningen tussen principes en pragmatisme
