10 1 2 defining substructures washington university in st louis - Oct 08 2022

substructures are defined using the substructure generation procedure the substructure creation and usage cannot be included in the same analysis multiple substructures can be generated in an analysis any substructure can consist of one or more other substructures if this is the case the nested level substructures must be defined first

a substructure database is the set of files that describe the mechanical and geometrical properties of a substructure and abaqus writes all substructure data to the substructure database during the substructure generation analysis

substructure generation in abaqus imechanica - Mar 01 2022

dec 17 2013 i have created a substructure in abaqus as output i will like to see the substructure matrices mass stiffness and damping matrices however i m only able to write the mass and stiffness matrices to an output file mtx does anyone know how to create an output file including both the mass stiffness and damping matrices of the substructure

substructuring and substructure analysis massachusetts - Feb 12 2023

the basic substructuring idea is to consider a substructure a part of the model separately and eliminate all but the degrees of freedom needed to connect this part to the rest of the model so that the substructure appears in the model as a substructure a collection of finite elements whose response is defined by the stiffness and mass o
