**American Journal of Education** ,1897     *History and GIS* Alexander Lünen,Charles Travis,2012-12-05 Geographical Information Systems GIS either as standard GIS or custom made Historical GIS HGIS have become quite popular in some historical sub disciplines such as Economic and Social History or Historical Geography Mainstream history however seems to be rather unaffected by this trend More generally speaking Why is it that computer applications in general have failed to make much headway in history departments despite the first steps being undertaken a good forty years ago With the spatial turn in full swing in the humanities and many historians dealing with spatial and geographical questions one would think GIS would be welcomed with open arms Yet there seems to be no general anticipation by historians of employing GIS as a research tool As mentioned HGIS are popular chiefly among Historical Geographers and Social and Economic Historians The latter disciplines seem to be predestined to use such software through the widespread quantitativemethodology these disciplines have employed traditionally Other historical sub disciplines such as Ancient History are also very open to this emerging technology since the scarcity of written sources in this field can be mitigated by inferences made from an HGIS that has archaeological data stored in it for example In most of Modern History however the use of GIS is rarely seen The intellectual benefit that a GIS may bring about seems not be apparent to scholars from this sub discipline and others This book wants to investigate and discuss this controversy Why does the wider historian community not embrace GIS more readily While one cannot deny that the methodologies linked with a GIS follow geographical paradigms rather than historical ones the potential of GIS as a killer application for digital historical scholarship should be obvious This book brings together authors from Geography and History to discuss the value of GIS for historical research The focus however will not be on the how but on the why of GIS in history
