strategy is linked via convenient matrices to the instructional routines that promote precision thinking on the part of students

Features

Differentiation between cognitive strategies for students and instructional routines teachers might use

Provides teachers and preservice teachers with a means to think about the tools they use to promote cognitive proficiency on the part of students

Often strategies are used a catch all term that does not clarify the difference between what teachers do and how students incorporate learn from those routines

Boxed features

Real teachers explain how they have used the tools discussed in the book

Provides teachers with examples to which they may be able to relate

Instead of an isolated example the voices of classroom teachers will explain how they have implemented instructional routines or promoted cognitive strategies for their students

Sound rationale coupled with step by step procedures

Teachers often like to know what works but many texts ignore their need and desire to know why a strategy or routine works

This text links rationale with tools so that readers will be able to explain why they are using a routine or assisting students to use cognitive tools to understand how they might think more precisely about the books they read

Theme

Prediction

Prediction is a popular request teachers make of their students but often teachers lack sufficient experience or rationale to know how students might use prediction to increase precision in thinking about books and other texts they read

Approach

Combination of both theoretical and research with useful tools

students and teachers can implement tomorrow

Many books take either a theoretical approach with little classroom application provided or a practical approach that does not help teachers understand why a given tool is useful and under what circumstances

This book combines the best of both approaches to help teacher readers understand why a strategy or routine is worth the instructional time that might be devoted to it
