Singularity Theory And Some Problems Of Functional Analysis:

Singularity Theory and Some Problems of Functional Analysis, 1992 *Concerning the Hilbert 16th Problem* S. Yakovenko, 1995 **Selected topics in discrete mathematics: Proceedings of the Moscow Discrete Mathematics Seminar, 1972-1990** Alexander K. Kelmans, 1994-02-18 This is a collection of translations of a variety of papers on discrete mathematics by members of the Moscow Seminar on Discrete Mathematics This seminar begun in 1972 was marked by active participation and intellectual ferment Mathematicians in the USSR often encountered difficulties in publishing so many interesting results in discrete mathematics remained unknown in the West for some years and some are unknown even to the present day To help fill this communication gap this collection offers papers that were obscurely published and very hard to find Among the topics covered here are graph theory network flow and multicommodity flow linear programming and combinatorial optimization matroid theory and submodular systems matrix theory and combinatorics parallel computing complexity of algorithms random graphs and statistical mechanics coding theory and algebraic combinatorics and group theory Proceedings of the St. Petersburg Mathematical Society, Volume I O. A. Ladyzhenskaya Anatoli_ Moiseevich Vershik, 1993-03-22 This is the inaugural volume of a new book series published under the auspices of the St Petersburg Mathematical Society The book contains contributions by some of the leading mathematicians in St Petersburg Ranging over a wide array of topics these papers testify to the diverse interests and productive mathematical life of the St Petersburg Mathematical Society **Some questions of differential geometry in the large** E. V. Shikin, 1996-07-16 This collection contains articles that present recent results by geometers in Russia and the Ukraine Papers in the collection deal with various questions related to the structure symmetries and embeddings of submanifolds in Euclidean and pseudo Euclidian spaces This collection offers a review of the challenges facing specialists in geometry in the large and features current research in the field **Three Papers on Algebras and Their Representations** V. N. Gerasimov, N. G. Nesterenko, A. I. Valitskas, 1993 This book contains the doctoral dissertations of three students from Novosibirsk who participated in the seminar of L A Bokut The dissertation of Gerasimov focuses on Cohn s theory of noncommutative matrix localizations Gerasimov presents a construction of matrix localization that is not directly related to prime matrix ideals of Cohn but rather deals with localizations of arbitrary subsets of matrices over a ring The work of Valitskas applies ideas and constructions of Gerasimov to embeddings of rings into radical rings in the sense of Jacobson to develop a theory essentially parallel to Cohn s theory of embeddings of rings into skew fields Nesterenko s dissertation solves some important problems of Anan in and Bergman about representations of infinite dimensional algebras and categories in triangular matrices over commutative rings Problems of Reducing the Exhaustive Search Vladik Kreinovich, 1997 This collection contains translations of papers on propositional satisfiability and related logical problems which appeared in roblemy Sokrashcheniya Perebora published in Russian in 1987 by the Scientific Council Cybernetics of the USSR Academy of Sciences The problems form the nucleus of

this intensively developing area This translation is dedicated to the memory of two remarkable Russian mathematicians Sergei Maslov and his wife Nina Maslova Maslov is known as the originator of the universe method in automated deduction which was discovered at the same time as the resolution method of J A Robison and has approximately the same range of applications In 1981 Maslov proposed an iterative algorithm for propositional satisfiability based on some general ideas of search described in detail in his posthumously published book *Theory of Deductive Systems and Its Applications* 1986 English 1987 This collection contains translations of papers on propositional satisfiability and related logical problems The papers related to Maslov s iterative method of search reduction play a significant role *Translations. Ser. 2, 159. Proceedings of the St. Petersburg Mathematical Society. - 2* United States. Office of Naval Research, 1994-11-22 This book contains papers on a wide range of topics including diophantine equations algebraic number theory ring theory theory of functions of a real variable partial differential equations approximation of functions differential geometry computing theory and statistical mechanics The last three papers present historical perspectives on mathematics in St Petersburg *Mathematical Reviews*, 2002 Notices of the American Mathematical Society American Mathematical Society, 1994 EUROCAL '85. European Conference on Computer Algebra. Linz, Austria, April 1-3, 1985. Proceedings Bob F. Caviness, 1985 **Topics in Statistical and Theoretical Physics** R. L. Dobrushin, Robert Adol'fovich Minlos, Mikhail Aleksandrovich Shubin, Anatoliï Moiseevich Vershik, 1996 This is the second of two volumes dedicated to the scientific heritage of F A Berezin 1931 1980 Before his untimely death Berezin had an important influence on physics and mathematics discovering new ideas in mathematical physics representation theory analysis geometry and other areas of mathematics His crowning achievements were the introduction of a new notion of deformation quantization and Grassmannian analysis supermathematics Collected here are papers by many of his colleagues and others who worked in related areas representing a wide spectrum of topics in statistical and theoretical physics and allied areas of mathematics In particular several papers discuss various aspects of quantum field theory and related questions of supersymmetry geometry and representation theory Other papers are devoted to problems of quasi classical approximation and mathematical models of statistical physics *Reviews in Complex Analysis, 1980-86*, 1989 *Reviews in Complex Analysis, 1980-1986*, 1989 **Bulletin (new Series) of the American Mathematical Society**, 2006 Catalogue American Mathematical Society, 2000 **U.S. Government Research & Development Reports**, 1967 **New Developments in Singularity Theory** Dirk Siersma, Charles Wall, V. Zakalyukin, 2001-06-30 Singularities arise naturally in a huge number of different areas of mathematics and science As a consequence singularity theory lies at the crossroads of paths that connect many of the most important areas of applications of mathematics with some of its most abstract regions The main goal in most problems of singularity theory is to understand the dependence of some objects of analysis geometry physics or other science functions varieties mappings vector or tensor fields differential equations models etc on parameters The articles collected here can be grouped under three headings A

Singularities of real maps B Singular complex variables and C Singularities of homomorphic maps **A Treatise on the
Theory of Functions** James Harkness, Frank Morley, 1893 *Reviews in Global Analysis, 1980-86 as Printed in
