**Implementation of quality control measures in project management and its impact on customer satisfaction** Markus Nohe, 2009-12-21 Master s Thesis from the year 2009 in the subject Business economics Business Management Corporate Governance grade 1 8 University of applied sciences Frankfurt a M language English abstract Initial situation The initial point of this research paper is the fact that continuous globalisation of world economy is leading to an increase of competitive pressure To persist in this competitive environment permanent innovation and increase of quality of products and services are necessary as well as an ongoing improvement of processes Quality here is the key to

success of companies and to insure wealth of a society In this context it gets more and more evident that existing structures within enterprises often are not sufficient anymore to meet the demands of an increase of speed of change and complexness of the enterprises environment Organisations are fragmented and structured hierarchical and for that reason too stolid In that situation projects hardly are completed by using established processes Therefore new forms of organization are necessary emphasizing on efficiency in internal management and communications To solve these challenges in daily business within a company the use of several concepts has proofed to be helpful organizational processing by using project management in particular In this contents more and more companies figure out that successful project management not only strengthens competitiveness but also has a positive impact on the efficiency of internal procedures Therefore it does not surprise that an increasing number of companies use the potential of project management In this context it is to be said that not every project is led to a successful end comp figure 1 More than half of the projects are cancelled before reaching the project target Only about 19% are completed successfully Requirements for quality management as a part of projects gain relevance in this context An in the project management integrated quality management that begins with quality issues within the target definition can help avoiding potential deficits in contents and thereby bring projects to a successful end Thus an improvement of competitiveness only seems realizable by use of a quality assured project management Due to a more and more homogenous range of services of the suppliers in the end customer market there are few distinguishing criteria Customer satisfaction is an adequate measure and developing to be the most important influencing factor of competitiveness
