**The Economics of Biodiversity Conservation** K.N Ninan,2012-05-16 Economic valuation of biodiversity and ecosystem services is possibly the most powerful tool for halting the loss of biodiversity while maintaining incomes and livelihoods Yet rarely have such approaches been applied to tropical forest hotspots which house the vast majority of the planets plant and animal species This ground breaking work is the most comprehensive and detailed examination of the economics of environmental valuation and biodiversity conservation to date Focusing on the Western Ghats of India one of the top biodiversity hotspots in the world this volume looks at a cross section of local communities living within or near sanctuaries and reserve forests such as coffee growers indigenous people and farmers cum pastoralists to assess the use and non use values that people derive from tropical forests It also looks at the extent of their dependence on forests for various goods and services and examines their perceptions and attitudes towards biodiversity conservation and wildlife protection

Randall Hepburn, 2012-12-06 Instead of dirt and poison we have rather chosen to fill our hives with honey and wax thus furnisning mankind with the two noblest of things which are sweetness and light Mindful of Swift's dictum this compilation is offered as an exhaustive coverage of a smallish literature on the synthesis and secretion of beeswax its elaboration into combs and the factors which bear on the execution of these processes by honeybees To codify any aspect of the biology of an animal of agricultural importance is to sift through myriad observations and experiments centuries old that come down to us enshrouded in the folk literature It is evident that wars and languages have also acted as barriers to the dissemination of knowledge about honeybees Thus particular care has been given to the primacy of discovery and its contextual significance I have endeavoured to not over interpret data and to allow the authors works to speak for themselves I have also tried to indicate some of the more obvious gaps in our knowledge of honeybees in relation to wax and to suggest some directions as to where we might proceed aided by discoveries made on other animals and plants This was done to remind the seasoned bee hand of our general neglect of beeswax biology historically constituting less than a percentage point of the apicultural literature **The Production of Wax by Honey Bees** Delos A.
