

## Biology Final Exam Review

### Safety:

1. What are 3 activities that are prohibited (not allowed) in the lab?  
(Give any 3 reasonable answers.)
2. What is the first thing you should **ALWAYS** do before performing an experiment?  
Read all directions carefully.
3. If glass is broken in the lab, how should it be handled?  
Use a broom and dustpan to sweep up debris.

### Experimental Design:

4. What are the steps of the scientific method in order?  
Ask a question, make observations, develop a hypothesis, perform an experiment, analyze results, draw conclusions, publish your findings.
5. Define the term Ctrl. How can you tell them apart?  
IV = The variable to be manipulated and observed.  
DV = The variable being tested or measured.  
The IV can be identified because it is the variable the experimenter can change. The DV can be identified because the results cannot be controlled, but data can be collected.
6. Why is it important to have a control group?  
The control group is the standard of comparison for the experimental groups.
7. Why is it important to have controls in an experiment?  
Controls help make sure that the results of the experiment are not due to uncontrollable factors when the experiment was conducted.

**The American Biology Teacher** ,2007-08    *Resources in Education* ,1988    Undergraduate Mathematics for the Life Sciences Glenn Ledder,Jenna P. Carpenter,Timothy D. Comar,2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses The result is an undergraduate education in biology with very little quantitative content New mathematics courses must be devised with the needs of biology students in mind In this volume authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students The problems are sorted into three themes Models Processes and Directions It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section Processes deals with taking that great course and making sure it is institutionalized in both the biology department as a requirement and in the mathematics department as a course that will live on even if the creator of the course is no longer on the faculty Directions looks to the future with each paper laying out a case for pedagogical developments that the authors would like to see
