Count to 10 and back in coordination with my breath.

Place my hands over my ears and breathe slowly & deeply, listening to the sound that my breath makes.

Roll my neck and shoulders.

Tell my teacher I would like to help or take on a classroom responsibility.

Rest my head on the desk for a moment or two.

Tell my teacher I need help with the assignment or lesson.

Push my palms together.

Give myself or a stuffed animal a great big hug.

Help a classmate or my teacher.

Cross my arms in front of me and do the arm pretzel.

Ask if I can do my work standing up.

Pretend I am squeezing a lemon in my fist, squeezing as hard as I can to get the lemon juice out. After a few moments, I can relax my hands.

Smile or laugh, even if I have to fake it.

Do an act of kindness.

Eat a healthy snack or let my teacher know I am hungry.

Rub or tap my temples.

Talk with my school counselor.

Cognitive Behaviour Therapy for People with Cancer Stirling Moorey,Steven Greer,2002 Cognitive Behaviour Therapy CBT has established itself as the psychological treatment of choice for many conditions. It offers a brief convincing common sense approach to the emotional problems faced by people with cancer and there is considerable evidence for its effectiveness. Since the first edition of this book in 1989 published as Psychological Therapy for Patients with Cancer there have been many developments in cognitive therapy and psycho oncology which have been incorporated in the new edition. The current evidence for the effect of psychological state on survival and the efficacy of CBT in cancer is reviewed. Using a cognitive behavioural model to understand reactions to cancer the authors present cognitive behavioural emotional and interpersonal interventions to help people adjust to the threat to their life and their view of themselves. Case examples illustrate how these techniques are used to reduce anxiety and depression induce a fighting spirit teach effective coping skills and develop open communication between patients and their partners. Mental health professionals working in oncology and health care professionals interested in psychological management will find this a useful source for psychological techniques that can be applied in a busy clinical setting.
