Civil Avionics Systems Ian Moir, Allan G. Seabridge, 2003. This book introduces the reader to an industry that has to deal with issues that are complex and sophisticated, market and technology driven, safety conscious, high integrity, and environmentally influenced. The civil avionics industry is driven by market factors and trends in public mobility, global business travel, and domestic leisure needs. World finances, terrorist activity, political pressure, or public loss of confidence resulting from a perception of poor safety also drives the industry. The text covers all aspects of civil avionics systems, including the technology, systems development, electronics, sensors, communication, and guidance aids, displays, controls, and systems integration. It further discusses future air navigation systems and military applications.

Introduction to Engineering Design and Problem Solving M. David Burghardt, 1999. Aimed at helping new engineering students gain a better perspective on engineering, this book draws particular attention to the creative aspects of engineering design that go hand in hand with the rigours of analysis.

Proceedings, 2001. Annotation: Contains 12 papers from a July 2001 workshop reporting on recent research in the processing of video data for the detection and recognition of events. Themes are event detection and tracking, human motion and action recognition, and multi-modal events. Specific topics include foreground segmentation using adaptive mixture models in color and depth, multi-modal 3-D tracking and event detection via the particle filter, and hierarchical motion history images for recognizing human motion. Other subjects are view-invariant representation and learning of human action content, based video retrieval by integration of spatio-temporal and stochastic recognition of events, and detecting semantic concepts using context and audiovisual features. This volume lacks a subject index. c. Book News Inc.
