The Cruellest Miles Gay Salisbury, Laney Salisbury, 2003 The heroic tale of the dogs and men who braved blizzard conditions to save Nome Alaska from diphtheria

The Cruellest Miles Gay Salisbury, Laney Salisbury, 2005-02-17 A stirring tale of survival thanks to man's best friend Seattle Times When a deadly diphtheria epidemic swept through Nome Alaska in 1925 the local doctor knew that without a fresh batch of antitoxin his patients would die The lifesaving serum was a thousand miles away the port was icebound and planes couldn't fly in blizzard conditions only the dogs could make it The heroic dash of dog teams across the Alaskan wilderness to Nome inspired the annual Iditarod Trail Sled Dog Race and immortalized Balto the lead dog of the last team whose bronze statue still stands in New York City's Central Park This is the greatest dog story never fully told until now

The Cruellest Miles Gay Salisbury, 2003 *Dogs in Health Care* Jill Lenk Schilp, 2019-10-08 Dogs have a storied history in health care and the human animal relationship has been used in the field for decades Certain dogs have improved and advanced the field of health care in myriad ways This book presents the stories of these pioneer dogs from the mercy dogs of World War I to the medicine toting sled dogs Togo and Balto to today's therapy dogs More than the dogs themselves this book is about the human animal relationship and moments in history where that relationship propelled health care forward

Constructing the Outbreak Katherine A. Foss, 2020-09-25 When an epidemic strikes media outlets are central to how an outbreak is framed and understood While reporters construct stories intended to inform the public and convey essential information from doctors and politicians news narratives also serve as historical records capturing sentiments responses and fears throughout the course of the epidemic Constructing the Outbreak demonstrates how news reporting on epidemics communicates more than just information about pathogens rather prejudices political agendas religious beliefs and theories of disease also shape the message Analyzing seven epidemics spanning more than two hundred years from Boston's smallpox epidemic and Philadelphia's yellow fever epidemic in the eighteenth century to outbreaks of diphtheria influenza and typhoid in the early twentieth century Katherine A. Foss discusses how shifts in journalism and medicine influenced the coverage preservation and fictionalization of different disease outbreaks Each case study highlights facets of this interplay delving into topics such as colonization tourism war and politics Through this investigation into what has been preserved and forgotten in the collective memory of disease Foss sheds light on current health care debates like vaccine hesitancy
