This important book explores how community-based interventions can bridge the gap between health services and the voluntary sector to create more sustainable, healthy communities. Moving beyond a technologically driven, medicalised approach to healthcare, the book shows how social prescribing can provide a direct pathway to improving community health, embracing connection and challenging inequality. Written by a practicing GP and illustrated through practical guidance, it demonstrates how this can offer a cost-effective preventative means to improving health outcomes, enabling communities to be more resilient when confronting major issues such as climate change or pandemics. Building to a case study of how these methods were used in one town, Ross-on-Wye, the book will be invaluable reading for those working in healthcare, public health, local authorities, and the voluntary sector, as well as students and researchers interested in these areas. **Launch Your Art Lessons Business** Barrett Williams, ChatGPT, 2024-11-23.
