Flint, 2013-09-23 Provides a solid foundational understanding of creativity that enables readers to elicit creative performance from their students The first book of its kind in the school library field The Creative Imperative School Librarians and Teachers Cultivating Curiosity Together assists educators school librarians school counselors and parents in learning about creativity and inquiry as well as how to foster these desired processes in school settings and beyond The work begins by addressing the foundational aspects of creativity and then discusses creativity within the educational setting exploring how educators can be more creative themselves and coax creative performance from their students The final part of the text focuses specifically on school libraries and the role of librarians in developing environments and opportunities for inquiry that nurture creativity

The Creative Imperative Charles M. Johnston, 1996 The Creative Imperative confronts the most critical question of our time how we must think to have a vital future It first introduced the thinking of Creative Systems Theory over thirty years ago and remains one of the most important resources for understanding the theory and its contribution It is also a valued reference for people interested in a deep understanding of creative process Creative Systems Theory is a comprehensive framework for understanding purpose change and interrelationship in human systems It helps us better understand the past tease apart current cultural dilemmas and make sense of what a vital human future will require of us The theory offers a overarching approach to understanding that reflects the more mature and encompassing kind of thinking that will become more and more essential in times ahead The Creative Imperative is significant not just for the insights it brings from Creative Systems Theory s beginnings but also for the particular attention it brings to many of the theory s foundational concepts In addition it richly documents ideas with photographs of art and architecture through history Much in Creative Systems Theory has not been expressed more richly or fully since

The Creativity Hoax George Morgan, Pariece Nelligan, 2018-01-22 Politicians educators and business leaders often tell young people they will need to develop their creative skills to be ready for the new economy Vast numbers of school leavers enrol in courses in media communications creative and performing arts yet few will ever achieve the creative careers they aspire to The big cities are filled with performers designers producers and writers who cannot make a living from their art craft They are told their creative skills are transferable but there is little available work outside retail service and hospitality jobs Actors can use their skills selling phone plans insurance or advertising space from call centres but usually do so reluctantly Most people in the creative industries work as low paid employees or freelancers or

as unpaid interns They put up with exploitation so that they can do what they love The Creativity Hoax argues that in this individualistic and competitive environment creative aspirants from poor and minority backgrounds are most vulnerable and precarious Although governments in the West stress the importance of culture and knowledge in economic renewal few invest in the support and infrastructure that would allow creative aspirants to make best use of their skills *Making Cultural Cities in Asia* June Wang, Tim Oakes, Yang Yang, 2015-12-22 This book examines the vast and largely uncharted world of cultural creative city making in Asia It explores the establishment of policy models and practices against the backdrop of a globalizing world and considers the dynamic relationship between powerful actors and resources that impact Asian cities Making Cultural Cities in Asia approaches this dynamic process through the lens of assemblage how the policy models of cultural creative cities have been extracted from the flow of ideas and how re-invented versions have been assembled territorialized and exported This approach reveals a spectrum between globally circulating ideals on the one hand and the place based contexts and contingencies on the other At one end of the spectrum this book features chapters on policy mobility in particular the political construction of the web of communication and the restructuring or rescaling of the state At the other end chapters examine the increasingly fragmented social forces their changing roles in the process and their negotiations alignments and resistances This book will be of interest to researchers and policy makers concerned with cultural and urban studies creative industries and Asian studies The Creative Imperative Denis Harris, 1993-02-01

Emergent Teaching Sam Crowell, David Reid-Marr, 2013-01-16 Emergent Teaching inspires teachers to teach with more spontaneity and creativity within an educational environment that is highly constrained It demonstrates through descriptive stories creative strategies and provides an intellectual foundation for emergent teaching The authors show how teachers can relate subject matter to students lives and experience They illustrate rituals and processes that help establish a caring learning community Finally the book applies the theories of complexity and chaos while reaffirming the natural wisdom that teachers possess within themselves The authors have chosen a narrative format that models rather than tells and encourages readers to connect to their own stories and experiences The book is consistent with the theoretical understandings and research in the complexity sciences but takes a narrative approach giving examples and illustrations of ideas through stories myths and parables that act as metaphors and illustrations Key topics and practices embedded in these stories include teaching the whole person strategies for creative teaching new understandings of process meaning centered learning building community in the classroom strengthening the student teacher relationship project based learning using art and nature in teaching embodied learning incorporating story and narrative in teaching rites of passage embracing the unpredictable uncharted spaces in teaching
