**The Political Dimensions of Religion** Said Amir Arjomand, 1993-08-03 This volume explores the relationship between religion and politics. It brings a varied sample of richly detailed comparative and case studies together with a set of analytical paradigms in an integrated framework. It is a major statement on a timely subject and a plea for the acknowledgment of normative pluralism as firmly rooted in the history of religion. The editor shows that the fact of political diversity in the history of world religions compels the acceptance of pluralism as a normative principle.

**Schools and the politics of religion and diversity in the Republic of Ireland** Karin Fischer, 2016-09-01 Offers an in-depth analysis of the historical political and ideological backdrop to the denominational education system in the Republic of Ireland.

Changes in the religious landscape in the early twentieth century. Religion and social conflict in the early twentieth century. Shifts in the religious landscape from World War II to the present. Religion and evolving social conflicts from World War II to the present. Cultural aspects of religion from World War II to the present. Conclusion: consensus, pluralism and hegemony in US religion.

**Religion in Liberal Democracy as a Form of Life** Christoph Baumgartner, 2024-12-03 Religion in Liberal Democracy as a Form of Life advances a theory to deal with the challenges connected to the liberal democratic ideal that all people are free to codetermine the future of their society and equally entitled to their religion and beliefs given the historical bias towards Christianity in politics and culture within many European societies. Religious diversity and social and political participation are in fact fiercely contested issues. Critical scholars from philosophy and cultural theory contest that liberal political theories of freedom of religion can adequately deal with issues connected to an increasingly diversified and secularized religious field in historically Christian societies. Consequently, they claim that politics based on such theories cannot deliver on the promise to ensure conditions that allow all members of society equal religious freedom and political participation. By outlining historical developments and by closely examining case studies of recent controversies about religious diversity in Germany and the Netherlands, this book identifies shortcomings of the currently predominant liberal account of freedom of religion or belief. Based on this analysis, the author proposes a more complex theory of liberal democracy as a form of life with religion and religious freedom as components of it. This takes into account that informal norms, social structures and predominant notions of belonging can function as powerful obstacles to freedom and equality even if formal legal and political institutions prohibit discrimination based on religion. Construing liberal democracy as a form of life that is as a set of social practices, attitudes and their institutional manifestations and material expressions shifts the focus of critical analysis from the law to informal structures and components. This provides an understanding of the dynamics of culturalized religion in society which has often been missing in political philosophical theories. The theory proposed in this book provides normative criteria for building liberal

democracies that are tolerant with respect to religious differences and solidaric in terms of ensuring conditions that allow all members of society to codetermine as equals the future of society irrespective of their religion or beliefs This book will appeal to scholars of political theory social and political philosophy religious studies sociology and anthropology *Values - Politics - Religion: The European Values Study* Regina Polak,Patrick Rohs,2023-07-18 This open access book analyses the international data of the European Values Study EVS 1990 2017 with a focus on the impact of religious on political values from empirical as well as theoretical perspectives i e sociology political and cultural studies philosophy ethics theology and the law It interprets results from interdisciplinary perspectives including the viewpoints of social ethics sociology and cultural studies law and practical theology In the political and public as well as media debates of the European Union the recourse to above all European and also Christian values has played a central and controversial role in the field of politics and religion for several decades This collection is a contribution to a qualified discourse on values in Europe by providing empirical hermeneutical and ethical criteria for a responsible use of the concept of values In addition to a comparison of political value systems in Western and Eastern Europe and the possible role of religion in this context the book also deals with topics such as f i solidarity economics and values value formation and law and values Additionally specific population groups such as the socio culturally marginalized strata are examined more closely Besides current scientific analyses and interpretations of interest to researchers from various disciplines this book also offers valuable impulses and suggestions for various multipliers in political civil society and religious organisations as well as a sound overview for graduate students
