The Politics of Agrarian Change in Asia and Latin America Howard Handelman, **The Politics of Agrarian Change in Asia and Latin America** Howard Handelman, 1981 [The Politics of agrarian change in Asia and Latin American](#), 1981

Political Conflict and Development in East Asia and Latin America Richard Boyd, Galjart Benno, Tak-Wing Ngo, 2007-01-24 Long run processes of socio economic change generate prodigious problems of social conflict and social control and governments responsible for these processes must therefore manage the resultant conflict. Consequently the success or failure of a government's management of such conflicts is a crucial factor in development outcomes. This volume investigates the political struggle for development specifically in two vital regions East Asia and Latin America. This analysis calls into question the dominant emphasis on institutional and cultural bases for stable growth. A careful historical account of the two regions is presented which permits the rigorous testing of conventional wisdoms regarding development. Of importance to a broad range of academics in the spheres of development studies, politics, political economy and sociology this book will also make an interesting read for those with a general interest in these areas. **The**

^A Oxford Handbook of Land Politics Saturnino M. Borras, Jennifer C. Franco, 2025-08-29 Access to land in all its multiple meanings is necessarily diverse complex and contentious and facilitating and maintaining such access constitutes a mosaic of social relations and institutional instruments rather than the minimalist and simplistic reduction of land to land property that in turn tends to be interpreted always as individual private property. The Oxford Handbook of Land Politics offers heterodox analytical tools to help the reader make sense of the complexity of the politics of land. **Latin America, 1979-1983**

Perspectives in Rural Development Studies Saturnino M. Borras Jr., 2013-09-13 Agrarian transformations within and across countries have been significantly and dynamically altered during the past few decades compared to previous eras provoking a variety of reactions from rural poor communities worldwide. The recent convergence of various crises financial, food, energy and environmental has put the nexus between rural development and development in general back onto the center stage of theoretical policy and political agendas in the world today. Confronting these issues will require re-engaging with critical theories taking politics seriously and utilizing rigorous and appropriate research methodologies. These are the common messages and implications of the various contributions to this collection in the context of a scholarship that is critical in two senses questioning prescriptions from mainstream perspectives and interrogating popular conventions in radical thinking. This book focuses on key perspectives, frameworks and methodologies in agrarian change and peasant studies. The contributors are leading scholars in the field of rural development studies: Henry Bernstein, Terence J. Byres, Saturnino M. Borras Jr., Marc Edelman, Cristóbal Kay, Benedict Kerkvliet, Philip McMichael, Shahra Razavi, Ian Scoones and Teodor Shanin. This book was previously published as a special issue of the *Journal of Peasant Studies*. **Food, Politics,**

and Society in Latin America John C. Super, Thomas C. Wright, 1985 Essays on food the economic policy of food security and sociological aspects of food consumption in Latin America examines the historical aspects of nutrition and urban area food distribution analyses food production in the land reform era subsistence farming and the role of USA in providing food aid to Brazil and Colombia covers food dependence and malnutrition in Venezuela the impact of revolution on food politics in Cuba and Nicaragua and the social implications of the green revolution Graphs references statistical tables *British Bulletin of Publications on Latin America, the Caribbean, Portugal and Spain*, 1980 *Third World/Iowa: Latin America* University of Iowa. Peasants are a majority of the world's poor Despite this there has been little effort to bridge the fields of peasant and poverty studies Peasant Poverty and Persistence in the Twenty first Century provides a much needed critical perspective linking three central questions Why has peasantry unlike other areas of non capitalist production persisted Why are the vast majority of peasants poor And how are these two questions related Interweaving contributions from various disciplines the book provides a range of responses offering new theoretical historical and policy perspectives on this peasant world drama Scholars from both South and North argue that in order to find the policy paths required to overcome peasants misery we need a seismic transformation in social thought to which they make important contributions They are convinced that we must build upon the peasant economy's advantages over agricultural capitalism in meeting the challenges of feeding the growing world population while sustaining the environment Structured to encourage debate among authors and mutual learning Peasant Poverty and Persistence takes the reader on an intellectual journey toward understanding the peasantry **Land**
