## **The Phenomenon Of Life:**

**The Phenomenon of Life** Hans Jonas,1966 Previous editions are cited in Books for College Libraries 3d ed In this classic text of phenomenology and existentialism Jonas sets forth an existential interpretation of biological facts laid out in support of the claim that the mind is prefigured throughout organic existence He further contends that life forms present themselves on an ascending scale of perception and freedom of action reaching its apex in the human capacity for thought and morally responsible behavior Annotation copyrighted by Book News Inc Portland OR The Phenomenon of Life Hans Jonas,1966 The Theosophist ,1912 The Topological Model of Genome and Evolution Pradeep Chhaya,2023-09-19 This book deals with the missing link in the domain of functional genomics viz genomic architecture It begins with a deconstruction of the Darwinian paradigm using the proposed model of modified involuted manifolds It recasts the process of natural selection as a process of information transfer Using a topological model this book outlines a new genomic architecture The key argument for this proposed model is that some such structuralism has always been implicit in genomics The proposed model fits very well with the known genomic characteristics and allows to separate the regulatory genome from the transcriptive genomes The model is capable of discerning modular architecture of genomes with different genomic functionalities existing in hierarchical relationships and demonstrates that genomes act as units of selection and as the environment for the individual genes which act as competing species Towards the end the book also examines the role of genomic evolution in cancer and the principles of natural selection and evolution of the genotype The regulatory genome is also discussed with an emphasis on its evolution and natural selection It is a valuable source for researchers working in functional genomics mathematical modeling in biology and evolutionary genomics The Chautauquan ,1881

**Durkheim, Bernard and Epistemology (Routledge Revivals)** Paul Q. Hirst,2010-11 This title first published in 1975 contains two complimentary studies by Paul Q Hirst the first based on Claude Bernard s theory of scientific knowledge and the second concerning Emile Durkheim s attempt to provide a philosophical foundation for a scientific sociology in The Rules of Sociological Method The author s primary concern is to answer the question is Durkheim s theory of knowledge logically consistent and philosophically viable His principal conclusion is that the epistemology developed in the Rules is an impossible one and that its inherent contradictions are proof that sociology as it is commonly understood can never be a scientific discipline The Dublin Quarterly Journal of Medical Science ,1871 A critique of Kant, tr. by W.S. Littell,1880 The Esoteric Hiram Erastus Butler,1888 The Encyclopaedia Britannica ,1890 Littell's Living Age ,1881 The Open Court ,1888 Nature ,1893 **English Mechanic and Mirror of Science and Art** ,1879 Introduction to the Theory of Science and Metaphysics Alois Riehl,1894 **Phenomenological Interpretations of Aristotle** Martin Heidegger,2008-12-17 In

this early lecture series the author of Being and Time develops his unique approach to understanding humanity's relationship to the world. This volume presents a collection of Martin Heidegger's lectures delivered at the University of Freiburg in the winter of 1921/1922. Preceding Being and Time the work shows the young Heidegger introducing novel vocabulary as he searches for his genuine philosophical voice. In this course Heidegger first takes up the role of the definition of philosophy and then elaborates a unique analysis of factual life or human life as it is lived concretely in relation to the world, a relation he calls caring. Heidegger's descriptions of the movement of life are original and striking. As he works out a phenomenology of factual life Heidegger lays the groundwork for a phenomenological interpretation of Aristotle whose influence on Heidegger's philosophy was pivotal.
