## **The Countryside:**

*Agriculture, the Countryside and Land Use* J. K. Bowers, Paul Cheshire, 2019-08-06 First published in 1983 How had the situation developed in which agriculture had become such a creature of state protection where public money supported prosperous landowners while poor farmers received practically nothing Where the value of agricultural support exceeded net farm income and vastly exceeded the level of support available to British Steel or British Rail In answering these questions John Bowers and Paul Cheshire examined the real value of agricultural support in successive policy phases since the Second World War and analysed the effects this support had on income distribution Their thesis was that agricultural change including the transfer of land from traditional farmers to institutions and corporations was not the product of impersonal progress but the direct result of agricultural support policies resting on specious economic arguments The authors analysis of this subject has inescapable relevance for the policymaker for the taxpayer and consumer of foodstuffs for the urban user of the British countryside and indeed for farmers and the farming lobby Agriculture the Countryside and Land Use will be an important book for all these groups and also for students of agriculture geography and economics

[A New Face on the Countryside](#) Timothy Silver, 1990-03-30 Silver traces the effects of English settlement on South Atlantic ecology showing how three cultures interacted with their changing environment

[Routledge Revivals: A Rural Policy for the EEC \(1984\)](#) Hugh Clout, 2017-11-22 First published in 1984 Hugh Clout's work contributes to one of the most debated and important topics of the time the European Economic Community Starting from the Mid 20th century Clout explains the profound socio economic and environmental changes that effected the countryside of Western Europe This work shows how the EEC's wide ranging Common Agricultural Policy added a measure of uniformity to farm policies Clout reveals that the transformation however was not an entirely healthy one The broad process of agricultural modernisation reinforced the numerical decline of farm workers throughout Western Europe weakened many rural communities and served to accentuate depopulation Clout's work ultimately argues forcibly that to produce such a programme for managing rural Europe would be a major challenge for the EEC in the future

**People and Place** Lewis Holloway, Phil Hubbard, 2001 An innovative introduction to Human Geography exploring different ways of studying the relationships between people and place and putting people at the centre of human geography The book covers behavioural humanistic and cultural traditions showing how these can lead to a nuanced understanding of how we relate to our surroundings on a day to day basis While taking the importance of these different approaches seriously as ways of thinking about the role of place in peoples everyday lives the book also tries to encapsulate what has been so vibrant and exciting about human geography over the last couple of decades By using examples to which students can relate such as how they imagine and represent their home the way they avoid certain spaces how they move through retail spaces where they choose to go to university how they use the Internet how they represent other nations and so on the authors show how geography shapes everyday life in a manner that is seemingly mundane yet profoundly important
