## **The Cupboard:**

Armchair Theatre Leonard White, 2003      Multistrategy Learning Ryszard S. Michalski, 1993-06-30 Most machine learning research has been concerned with the development of systems that implement one type of inference within a single representational paradigm. Such systems, which can be called monostrategy learning systems, include those for empirical induction of decision trees or rules, explanation-based generalization, neural net learning from examples, genetic algorithm-based learning, and others. Monostrategy learning systems can be very effective and useful if learning problems to which they are applied are sufficiently narrowly defined. Many real-world applications, however, pose learning problems that go beyond the capability of monostrategy learning methods. In view of this, recent years have witnessed a growing interest in developing multistrategy systems which integrate two or more inference types and/or paradigms within one learning system. Such multistrategy systems take advantage of the complementarity of different inference types or representational mechanisms. Therefore, they have a potential to be more versatile and more powerful than monostrategy systems. On the other hand, due to their greater complexity, their development is significantly more difficult and represents a new great challenge to the machine learning community. Multistrategy Learning contains contributions characteristic of the current research in this area.

Language and Material Culture Allison Paige Burkette, 2015-09-15 This innovative and provocative work introduces complexity theory and its application to both the study of language and the study of material culture. The book begins with a wide-ranging theoretical background covering the areas of dialect geography, the anthropological study of material culture, and a general introduction to the study of complex adaptive systems. Following this general introduction, the principles of complexity theory are demonstrated in data drawn from linguistics and material culture studies. *Language and Material Culture* further highlights the principles of complexity through a series of case studies using data from the Linguistic Atlas of Colonial American Inventories and the Historic American Building Survey. LMC shows that language and material culture are intertwined as they interact within the same cultural complex system. The book is designed for students in courses that focus on language variation, American English, and material culture, in addition to general courses on applications of complex systems.

**Intersubjective Temporality** Lanei M. Rodemeyer, 2006-02-16 YET ANOTHER INTRODUCTION IN PHENOMENOLOGY In both his published and unpublished works Edmund Husserl the father of phenomenology struggles repeatedly with the relation of the individual subject and intersubjectivity Since his phenomenology is based upon the temporalizing foundations of the subject though he is often accused of solipsism and his efforts at integrating the subject with an intersubjective existence are registered as falling short of their goal Important philosophers who use phenomenology as their basis such as Martin Heidegger and Maurice Merleau Ponty furthermore while implicitly criticizing his limitations assume the existence of intersubjective foundations without taking up the existence and formation of these foundations themselves This book addresses the above problematic at several levels First it is a careful analysis of Husserl's understanding of inner time consciousness I take up each aspect of temporalizing consciousness i.e. Urimpression retention and protention explaining it in light of Husserl's phenomenology and showing how it functions in the whole of the living present i.e. our active constituting consciousness These sections of the book are helpful both to the uninitiated student trying to enter the world of Husserl's inner time consciousness and to the experienced Husserl scholar who desires a closer look at Husserl's theory of temporalizing consciousness Second as my analyses take us to Husserl's recently published manuscripts I provide an explanation of Husserl's later considerations of temporalizing consciousness showing how he developed his earliest conceptions

Susie the wild one had an adventurous life while Camilla Mills followed a safer path. When Susie suddenly dies, Mills falls apart. Until she receives a bundle of mysterious letters from her estranged sister to be read in the case of her death. Each letter instructs her to visit a place special to Susie both to spread her ashes but also to uncover some truths Susie has long kept hidden from her family. Their mother Margaret has secrets of her own. When living in Swinging Sixties London she too made a decision about her life that not only haunts her but will reverberate through the generations. One family three very different women. What choices and secrets connect them. In this novel of truth and lies, concealment and regret, Jane Cockram flips the looking glass to expose our true face, revealing the deep lines of deception that can run through families and how the people we love the most often have the most to hide.
