Why be Moral? Kai Nielsen,1989 No Marketing Blurb **Mencius, Hume and the Foundations of Ethics** Xiusheng Liu,2017-05-15 What is the most distinctive feature of human nature Does human nature play any significant role in explaining ethical objectivity How do we arrive at moral judgments What is the relationship between moral judgments and moral motivation In answering these questions this book defends a naturalist realist and internalist theory of the foundations of ethics This theory grounded on a particular concept of humanity combines insights from Mencius and David Hume The views of each show how important features left underdeveloped by the other can be supplemented and refined The unified theory that results is a robust contender among current ethical theories This illuminating book relating Chinese and Western philosophical traditions presents a unique account of the unity of the virtues in Mencius breaks new ground in Hume studies through its discussion of the concept of sympathy in Hume s theory and brings combined insights to bear on contemporary analytical theories of ethics *Incommensurability and its Implications for Practical Reasoning, Ethics and Justice* Martijn Boot,2017-06-27 If values conflict and rival human interests clash we often have to weigh them against each other However under particular conditions incommensurability prevents the assignment of determinable and impartial weights In those cases an objective balance does not exist The original thesis of this book sheds new light on aspects of incommensurability and its implications for public decision making ethics and justice Martijn Boot analyzes a number of previously ignored or unrecognized concepts such as incomplete comparability incompletely justified choice indeterminateness and ethical deficit concepts that are essential for comprehending problems of incommensurability Apart from problematic implications incommensurability has also favourable consequences It creates room for autonomous rational choices that are not dictated by reason Besides insight into incommensurability promotes recognition of different possible rankings of universally valid but sometimes conflicting human values This book avoids unnecessary technical language and is accessible not only for specialists but for a large audience of philosophers ethicists political theorists economists lawyers and interested persons without specialized knowledge **Reasoning in Ethics and Law** A. W. Musschenga,Wim J. van der Steen,1999 Legal and moral reasoning share much methodology and they address similar problems This volume charts two shared problems the relation between theory principles and particular judgments and the role of facts and factual assertions in normative settings The relation between theory and practice and between principle and particular judgment has become the subject of much debate in moral philosophy In the ongoing debate some moral philosophers refer to legal philosophy for a support of their views on the primacy of practice over theory According to them legal philosophy should have a more balanced view in that

relation In the contributions to Part One this claim is critically analysed The role of the facts is underestimated in discussions on legal reasoning and legal theory as well as moral reasoning and ethical theory Factual statements enter into moral and legal discussions not only because they link the conclusion with a rule They also play a role as background assumptions in supporting a theory Its focus on the role of facts in normative reasoning makes this book of special interest to scholars of legal and moral argumentation

Particularism and the Space of Moral Reasons Benedict Smith, 2011 By explicitly addressing moral knowledge from a particularists perspective this book can engage with an established and vibrant area of moral philosophy whilst making a distinctive and productive contribution to a relatively neglected dimension of it **The Place of Reason in Ethics** Stephen Edelston Toulmin, 1986 World Philosophy: 1932-1971 Frank Northern Magill, 1982

The Journal of the Indian Academy of Philosophy Indian Academy of Philosophy, 1967 **Re-Reasoning Ethics** Barry Hoffmaster, Cliff Hooker, 2023-10-31 How developing a more expansive non formal conception of reason produces richer ethical understandings of human situations explored and illustrated with many real examples In *Re Reasoning Ethics* Barry Hoffmaster and Cliff Hooker enhance and empower ethics by adopting a non formal paradigm of rational deliberation as intelligent problem solving and a complementary non formal paradigm of ethical deliberation as problem solving design to promote human flourishing The non formal conception of reason produces broader and richer ethical understandings of human situations not the simple constrained depictions provided by moral theories and their logical applications in medical ethics and bioethics Instead it delivers and vindicates the moral judgment that complex contextual and dynamic situations require Hoffmaster and Hooker demonstrate how this more expansive rationality operates with examples first in science and then in ethics Non formal reason brings rationality not just to the empirical world of science but also to the empirical realities of human lives Among the many real cases they present is that of how women at risk of having children with genetic conditions decide whether to try to become pregnant These women do not apply the formal principle of maximizing expected utility as advised by genetic counselors and instead imagine scenarios of what their lives could be like with an affected child and assess whether they could accept the worst of these scenarios Hoffmaster and Hooker explain how moral compromise and a liberated extended and enriched reflective equilibrium expand and augment rational ethical deliberation and how that deliberation can rationally design ethical practices institutions and policies **A Study of Ethical Principles ... Third Edition, Revised and Enlarged** James SETH, 1898 Morality, Reason, and Truth David Copp, David Zimmerman, 1985 The thirteen papers address various dimensions of the complex relationship between morality and rationality Most of the papers are new and they are generally at the cutting edge of current research The collection is a substantial and important contribution to metaethics **A Study of Ethical Principles** James Seth, 1898 *An Examination of the Place of Reason in Ethics* Stephen Edelston Toulmin, 1950 **Introduction to Ethics** Théodore Jouffroy, 1873 Constructive Ethics, a Review of Modern Moral Philosophy in Its Three Stages of Interpretation, Criticism, and Reconstruction William Leonard

Courtney,1886
