Diaries of Court Ladies of Old Japan: The Sarashina Diary, The Diary of Murasaki Shikibu, The Diary of Izumi Shikibu

Murasaki Shikibu, Izumi Shikibu, 1963-01-01 The Japanese have a convenient method of calling their historical periods by the names of the places which were the seats of government while they lasted. The first of these epochs of real importance is the Nara Period, which began A.D. 710 and endured until 794, all before that may be classed as archaic. Previous to the Nara Period the Japanese had been a semi nomadic race. As each successive Mikado came to the throne he built himself a new palace and founded a new capital. There had been more than sixty capitals before the Nara Period. Such shifting was not conducive to the development of literature and the arts, and it was not until a permanent government was established at Nara that these began to flourish. This is scarcely the place to trace the history of Japanese literature, but fully to understand these charming *Diaries of Court Ladies of Old Japan* it is necessary to know a little of the world they lived in to be able to feel their atmosphere and recognize their allusions. We know a good deal about Japan to day but the Japan with which we are familiar only slightly

resembles that of the Diaries Centuries of feudalism of Dark Ages have come between We must go behind all this and begin again We have all heard of the Forty seven Ronins and the N Drama of Sh guns Daimios and Samurais and many of us live in daily communion with Japanese prints It gives us pause to reflect that the earliest of these things is almost as many centuries ahead of the Ladies as it is behind us Sh gun means simply General and of course there were always generals but the power of the Sh guns and the military feudalism of which the Daimios and their attendant Samurais were a part did not really begin until the middle of the twelfth century and did not reach its full development until the middle of the fourteenth the N Drama started with the ancient religious pantomimic dance the Kagura but not until words were added in the fourteenth century did it become the N and block colour printing was first practised in 1695 while such famous print artists as Utamaro Hokusai and Hiroshige are all products of the eighteenth or early nineteenth centuries To find the Ladies behind the dark military ages we must go back a long way even to the century before their own and so gain a sort of perspective for them and their time Chinese literature and civilization were introduced into Japan somewhere between 270 and 310 A D and Buddhism followed in 552 Of course all such dates must be taken with a certain degree of latitude Oriental historians are anything but precise in these matters Chinese influence and Buddhism are the two enormous facts to be reckoned with in understanding Japan and considering what an effect they have had it is not a little singular that Japan has always been able to preserve her native character To be sure Shintoism was never displaced by Buddhism but the latter made a tremendous appeal to the Japanese temperament as the Diaries show In fact it was not until the Meiji Period 1867 1912 that Shintoism was again made the state religion With the introduction of Chinese civilization came the art of writing when is not accurately known but printing from movable blocks followed from Korea in the eighth century As was inevitable under the circumstances Chinese came to be considered the language of learning Japanese scholars wrote in Chinese All the serious books history theology science law were written in Chinese as a matter of course But in 712 a volume called Records of Ancient Matters was compiled in the native tongue It is the earliest book in Japanese now extant If the scholars wrote in a borrowed language the poets knew better They wrote in their own and the poetry of the Nara Period has been preserved for us in an anthology the Manyoshu or Collection of One Thousand Leaves This was followed at the beginning of the tenth century by the Kokinshu Ancient and Modern Poems to which however the editor Tsurayuki felt obliged to write a Chinese preface The Ladies of the Diaries were extremely familiar with these volumes their own writings are full of allusions to poems contained in them Sei Sh nagon writing early in the eleventh century describes a young lady s education as consisting of writing music and the twenty volumes of the Kokinshu So it came about that while learned gentlemen still continued to write in Chinese poetry fiction diaries and desultory essays called Zui hitsu Following the Pen were written in Japanese Now the position of women at this time was very different from what it afterwards became in the feudal period The Chinese called Japan the Queen Country because of the ascendancy which women enjoyed there They were educated they were allowed a share of inheritance and

they had their own houses It is an extraordinary and important fact that much of the best literature of Japan has been written by women Three of these most remarkable women are the authors of the Diaries a fourth to be named with them Sei Sh nagon to whom I have just referred was a contemporary In 794 the capital was moved from Nara to Ki to which was given the name of Heian jo or City of Peace and with the removal a new period the Heian began It lasted until 1186 and our Ladies lived in the very middle of it By this time Japan was thoroughly civilized she was indeed a little over civilized a little too fined down and delicate At least this is true of all that life which centred round the court at Ki to To historians the Heian Period represents the rise and fall of the Fujiwara family This powerful family had served the Mikados from time out of mind as heads of the Shinto priests and after the middle of the seventh century they became ministers or prime ministers An immense clan they gradually absorbed all the civil offices in the Kingdom while the military offices were filled by the Taira and Minamoto families It was the rise of these last as the Fujiwara declined which eventually led to the rule of the Sh guns and the long centuries of feudalism and civil war But in the middle of the Heian Period the Fujiwara were very much everywhere Most of those Court ladies who were the authors of remarkable books were the daughters of governors of provinces and that meant Fujiwaras to a greater or lesser degree At that time polygamy flourished in Japan and the family had grown to a prodigious size Since a civil office meant a post for a Fujiwara many of them were happily provided for but they were so numerous that they outnumbered the legitimate positions and others had to be created to fill the demand The Court was full of persons of both sexes holding sinecures with a great deal of time on their hands and nothing to do in it but write poetry which they did exceedingly well and attend the various functions prescribed by etiquette Ceremonials were many and magnificent and poetry writing became not only a game but a natural adjunct to every possible event The Japanese as a nation are dowered with a rare and exquisite taste and in the Heian Period taste was cultivated to an amazing degree Murasaki Shikibu records the astounding pitch to which it had reached in a passage in her diary Speaking of the Mikado s ladies at a court festivity she says of the dress of one of them One had a little fault in the colour combination at the wrist opening When she went before the Royal presence to fetch something the nobles and high officials noticed it Afterwards Lady Saisho regretted it deeply It was not so bad only one colour was a little too pale
