The Politics Of Denial:

The Politics of Denial Michael A. Milburn, Sheree D. Conrad, 1996 What is the driving force behind the rage of America's white males? Emotion appears to be playing a growing role in politics as evidenced by vociferous opposition to welfare, abortion, and immigrants as well as by the rise of the radical Religious Right, anti-environmentalism, and the increasingly neoconservative slant of American public opinion. The Politics of Denial presents a compelling explanation of these phenomena, providing solid empirical evidence for the role of rigid, harsh child-rearing practices in the creation of punitive, authoritarian adult political attitudes. The authors, social psychologists, show how both the political and the public policy processes in the United States are distorted by the unresolved negative emotions such as fear, anger, and helplessness that remain from punitive parenting and by the politicians and conservative religious leaders who exploit those emotions. Among the many public figures discussed are Patrick Buchanan, Newt Gingrich, Ronald Reagan, and Billy Graham. The Politics of AIDS Denialism Pieter Fourie, Melissa Meyer, 2016-03-03 Successive South African governments have had controversial views on HIV and AIDS which have led to allegations that South Africa is in a state of denial about the AIDS epidemic. This book attempts to determine the validity of such claims of government denial by formulating and testing a denial hypothesis. The hypothesis is contextualized with an overview of the South African epidemic as well as a review of allegations of government denial. It reveals possible political factors that may motivate policy makers to resort to official denial and tentatively concludes with a confirmation of the allegations contained in the denial hypothesis. However, this is done within the broader notion that denial is inherently vague and couched in language rarely in writing and therefore difficult to test with certainty, and as such this book's real value lies in the insights gained into the complex politics of denial. By exploring the dynamics of denial and denialism and applying this to the South African AIDS epidemic, this study provides a comprehensive analysis.

The Political Economy of Low Carbon Transformation Harold Wilhite, 2016-03-10 Deep reductions in energy use and carbon emissions will not be possible within political economies that are driven by the capitalist imperatives of growth commodification and individualization As such it has now become necessary to understand the relationship between capitalism and the emergence of high energy habits Using the examples of home energy transport and food The Political Economy of Low Carbon Transformation articulates the relationship between the politics of economic expansion and the formation of high energy habits at the level of family and household The book elaborates a theory of habit and how it can contribute to this relationship It critiques mainstream green economy and green energy prescriptions for low carbon transformation that take economic growth for granted and ignore habits formed in a material world designed and built for high energy use The book explores the growing number of communities around the world that are engaged in collaborative efforts to reform their community and household habits in ways that are less environmentally intrusive It assesses their potential to make an impact on national and urban low carbon political agendas The book is aimed at a large and growing interdisciplinary audience interested in the relationship between political economy consumption and sustainability
