

HOW TO READ A SAFETY DATA SHEET

OSHA Brief

The most recent version of the Standardized Product Safety Information (SDI) document, Revision 2020, replaces the chemical hazard information, distribution, and exposure control information in the Safety Data Sheet (SDS) required by the Occupational Safety and Health Administration (OSHA) for the workplace. The revised SDSs are designed to better reflect hazard information, health hazards, and control measures associated with the health and environmental conditions of the SDSs.

The SDSs include information such as the properties of each individual chemical, physical, health, and environmental health hazards, protective measures, and safety precautions for handling, storage, and disposal of the chemical. This information is intended to be used in the workplace to help workers understand how to handle the chemical safely. The SDSs must be available to all employees in the workplace, including contractors, and must be updated annually or whenever significant changes are made to the SDSs.

Revised SDSs include hazard classification (Health, Environmental, and Physical) and hazard communication information such as hazard statements and hazard categories. The SDSs also include information on protective measures, including recommendations for personal protection, engineering controls, and housekeeping.

The SDSs must also contain Sections 3 through 10, as the components used in the chemical must be included in Sections 3 and 10 of the SDSs. The SDSs must also contain Sections 11 through 15, as required by OSHA, including hazard communication, and labeling of chemicals (HCS), first-aid, and safety data sheets (SDSs) for each component.

The SDSs must also contain Sections 11 through 15, as the components used in the chemical must be included in Sections 3 and 10 of the SDSs. The SDSs must also contain Sections 11 through 15, as required by OSHA, including hazard communication, and labeling of chemicals (HCS), first-aid, and safety data sheets (SDSs) for each component.
