

## JANUARY ... DOES IT BRING YOU JOY?

1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5

2 In order to live their best lives, people are spreading themselves thinner and thinner with ~~multiple~~ streams of income. In the process we earn more but live less, we lose our ~~focus~~ of what is important.

3 With social media, ~~keeping up with other Instagrammers~~ are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

**Impacts of the Fukushima Nuclear Accident on Fish and Fishing Grounds** Kaoru Nakata, Hiroya

Sugisaki, 2015-07-10 This book presents the results from the Japanese Fisheries Research Agency's 3 year intensive monitoring of radionuclides in a variety of fish plankton benthos and their living environments after the Fukushima Daiichi Nuclear Power Plant FNPP accident in March 2011. The book reveals the dynamics of contamination processes in marine and freshwater fish mediated by the contamination of water sediments and food organisms. It also clarifies the mechanisms by which large variations in the level of contamination occurs among individual fish. Most importantly the book includes a large amount of original measurement data collected in situ and for the first time assesses diffusion of radio cesium across the Pacific using both in situ data and a numerical simulation model. Also introduced are several new approaches to evaluate the impact of the release of radionuclides including the measurement of radiation emission from an otolith section to identify the main period of contamination in fish. The FNPP accident represents a rare instance where the environmental radioactivity level was elevated steeply through atmospheric fallout and direct discharge of radioactive water into the sea over a short period of time. Replete with precise scientific data this book will serve as an important resource for research in fields such as fishery science, oceanography, ecology and environmentology and also as a solid basis for protecting fisheries from damage resulting from harmful rumors among the general public.
