Symbolization And Its Discontents:

Symbolization and Its Discontents Jeanne Randolph, Steve Reinke, 1997 A follow up to Jeanne Randolph's influential Psychoanalysis and Synchronized Swimming Randolph addresses Enlightenment values by introducing psychoanalytic terms that recognize culture as a flux of working fictions embodying one's social allegiances vested interests and commitment to values

Meaning and Authenticity Cesar Grafa, 2023-03-31 This outstanding collection of hitherto unpublished work written over the last fifteen years of the author's life reveals the development and maturation of his ideas about sociology and art and specifically about the relationship between them Grafa sees in the artistic traditions of Western society the sociological sources of our sense of cultural form as well as cultural and intellectual meaning He discusses theories of art and theories of artists as they have changed over time although the book is neither a history of art nor a criticism of specific artistic works Rather it is a defense of the sociology of art Grafa believes that the difficult and ambitious questions in the sociology of art are not merely questions of the proper role or status of the artist or the recognition of art as an ornament perhaps the supreme ornament of our culture He believes that what the sociologist must come to terms with is the view of art as the representation indeed the revelation of what is most telling and pervasive in culture itself This perspective assumes that the most serious claims made for art are in fact inseparable from the unique claims that are made about art Art can make visible what is implicit in our lives Art can put before us a statement of what we are but do not always recognize in ourselves Art is the mask and mimicry through which society gestures to us its ultimate and most poignant meanings Grafa contends that this vision of art derives from Hegelian aesthetics and he believes that this grand view whether one takes an idealist a literary or a Marxist materialist position also implies a dramatically changed conception of society itself The essays cover a variety of subjects from Marx museums and modern literature to Durkheim Daniel Bell and bullfighting the last being the apotheosis of cultural expression rendered into artistic form Throughout Grafa considers questions of the social origins of our artistic and intellectual traditions the influence of these traditions on our ways of thinking about society and their pervasiveness as standards for social meaning

The House of the Father As Fact and Symbol J. David Schloen, 2018-07-17 The first two volumes on patrimonialism in Ugarit and the ancient Near East this book opens with a lengthy introduction on the interpretation of social action and households in the ancient world Following this foundation Schloen embarks on a societal and domestic study of the Late Bronze Age kingdom of Ugarit in its wider Near Eastern context

Word Meaning and Syntax Stephen Wechsler, 2015 This book examines the nature of the interface between word meaning and syntax one of the most controversial and elusive issues in contemporary linguistics It approaches the interface from both sides of the relation and surveys a range of views on the mapping between them with an emphasis on lexical approaches to argument structure Stephen Wechsler begins by analysing the fundamental problem of word meaning with discussions of vagueness and polysemy complemented with a look at the roles of world knowledge and normative aspects of word meaning He then

surveys the argument taking properties of verbs and other predicates and presents key theories of lexical semantic structure. Later chapters provide a description of formal theories and frameworks for capturing the mapping from word meaning to syntactic structure as well as arguments in favour of a lexicalist approach to argument structure. The book will interest scholars of theoretical linguistics particularly in the fields of syntax and lexical semantics as well as those interested in psycholinguistics and philosophy of language

A Psychoanalytic Exploration of the Contemporary Search for Pleasure Vaia Tsolas, Christine Anzieu-Premmereur, 2023-07-19 This interdisciplinary collection of essays explores the malaise of the contemporary individual by returning the economic point of view of Freudian thinking the concept of satisfaction libido and pleasure/unpleasure principle to their rightful place as the motivating forces of human existence. For Freud pleasure stands apart from other human experiences side by side with unpleasure always a bonus in the search for satisfaction of the pleasure principle and beyond. Along with libido emotional fulfillment and the capacities for sublimation and play pleasure has not been given enough attention in the psychoanalytic literature. The editors of this book address this lack and highlight the importance of examining today's social and individual malaise through these specific lenses of inquiry. It is particularly timely and important today to address this lack and thereby examine the impact of the social phenomena of the pandemic, the crises of ideals and virtuality on the subject who feels in a state of constant emergency overwhelmed, addicted and delibidinalized. With contributions from across psychoanalysis this book is essential reading for psychoanalysts in training and in practice who want to understand how the modern world has shaped our understanding of pleasure.

Symbolization and Creativity Susan K. Deri, 1984 [The History of Freemasonry, Its Antiquities, Symbols, Constitutions, Customs, Etc](#) Robert Freke Gould, 1885 [The History of Freemasonry, Its Antiquities, Symbols, Constitutions, Customs, Etc. Embracing an Investigation of the Records of the Organisations of the Fraternity in England, Scotland, Ireland, British Colonies, France, Germany, and the United States](#) Robert Freke Gould, 1887 [The Political Uses of Symbols](#) Charles D. Elder, Roger W. Cobb, 1983 [Thinking Computers and Virtual Persons](#) Eric Dietrich, 2014-05-10

Thinking Computers and Virtual Persons Essays on the Intentionality of Machines explains how computations are meaningful and how computers can be cognitive agents like humans. This book focuses on the concept that cognition is computation. Organized into four parts encompassing 13 chapters this book begins with an overview of the analogy between intentionality and phlogiston the 17th century principle of burning. This text then examines the objection to computationalism that it cannot prevent arbitrary attributions of content to the various data structures and representations involved in a computational process. Other chapters consider that the notion of original intentionality is incoherent. This book argues as well that the only way to build an intelligent machine is to build a neural network. The final chapter claims that an entire theoretical framework in cognitive psychology is incompatible with the view that human brains are computers of some sort. This book is a valuable resource for cognitive scientists
