

## Understanding Distributive Property

1. Using the distributive property, find the value of each of the expressions.

$$8 \times (n + 3) \quad \text{if } n = 5$$

$$= (8 \times \underline{\quad}) + (8 \times \underline{\quad})$$

$$= \underline{\quad} + \underline{\quad}$$

$$= \underline{\quad}$$

$$0.5 \times (50 + n) \quad \text{if } n = 10$$

$$= (0.5 \times 50) + (0.5 \times \underline{\quad})$$

$$= \underline{\quad} + \underline{\quad}$$

$$= \underline{\quad}$$

$$5 \times (10 + n) \quad \text{if } n = 5$$

$$= (5 \times 10) + (5 \times \underline{\quad})$$

$$= \underline{\quad} + \underline{\quad}$$

$$= \underline{\quad}$$

$$0.5 \times (70 + n) \quad \text{if } n = 15$$

$$= (0.5 \times 70) + (0.5 \times \underline{\quad})$$

$$= \underline{\quad} + \underline{\quad}$$

$$= \underline{\quad}$$

$$3 \times (n + 5) \quad \text{if } n = 0.4$$

$$= (3 \times \underline{\quad}) + (3 \times 5)$$

$$= \underline{\quad} + \underline{\quad}$$

$$= \underline{\quad}$$

$$0.2 \times (10 + n) \quad \text{if } n = 3$$

$$= (0.2 \times 10) + (0.2 \times \underline{\quad})$$

$$= \underline{\quad} + \underline{\quad}$$

$$= \underline{\quad}$$

2. Check if the equation  $5 \times (n + 13) = 105$  is true where  $n = 8$  by using distributive property.

assessing collaborating and designing powerful mathematics curriculum      Uncomplicating Algebra to Meet Common Core Standards in Math, K-8 Marian Small, 2014-05-26 In the second book in the Uncomplicating Mathematics Series professional developer Marian Small shows teachers how to uncomplicate the teaching of algebra by focusing on the most important ideas that students need to grasp Organized by grade level around the Common Core State Standards for Mathematics Small shares approaches that will lead to a deeper and richer understanding of algebra for both teachers and students The book opens with a clear discussion of algebraic thinking and current requirements for algebraic understanding within standards based learning environments The book then launches with Kindergarten where the first relevant standard is found in the operations and algebraic thinking domain and ends with Grade 8 where the focus is on working with linear equations and functions In each section the relevant standard is presented followed by a discussion of important underlying ideas associated with that standard as well as thoughtful concept based questions that can be used for classroom instruction practice or assessment The Common Core State Standards for Mathematics challenges students to become mathematical thinkers not just mathematical doers This resource will be invaluable for pre and inservice teachers as they prepare themselves to understand and teach algebra with a deep level of understanding      *Using Design Research and History to Tackle a Fundamental Problem with School Algebra* Sinan Kanbir, M. A. (Ken) Clements, Nerida F. Ellerton, 2017-10-28 In this well illustrated book the authors Sinan Kanbir Ken Clements and Nerida Ellerton tackle a persistent and universal problem in school mathematics why do so many middle school and secondary school students find it difficult to learn algebra well What makes the book important are the unique features which comprise the design research approach that the authors adopted in seeking a solution to the problem The first unique feature is that the authors offer an overview of the history of school algebra Despite the fact that algebra has been an important component of secondary school mathematics for more than three centuries there has never been a comprehensive historical analysis of factors influencing the teaching and learning of that component The authors identify through historical analysis six purposes of school algebra a algebra as a body of knowledge essential to higher mathematical and scientific studies b algebra as generalized arithmetic c algebra as a prerequisite for entry to higher studies d algebra as offering a language and set of procedures for modeling real life problems e algebra as an aid to describing structural properties in elementary mathematics and f algebra as a study of variables They also raise the question whether school algebra represents a unidimensional trait Kanbir Clements and Ellerton offer an unusual hybrid theoretical framework for their intervention study by which seventh grade students significantly improved their elementary algebra knowledge and skills Their theoretical frame combined Charles Sanders Peirce's triadic signifier interpretant signified theory which is in the realm of semiotics with Johann Friedrich Herbart's theory of apperception and Ken Clements and Gina Del Campo's theory relating to the need to expand modes of communications in mathematics classrooms so that students engage in receptive and expressive modes Practicing classroom teachers formed part of the research team This

book appears in Springer's series on the History of Mathematics Education. Not only does it include an important analysis of the history of school algebra but it also adopts a theoretical frame which relies more on theories from the past than on contemporary theories in the field of mathematics education. The results of the well designed classroom intervention are sufficiently impressive that the study might have created and illuminated a pathway for future researchers to take.
