Statement of Disbursements of the House United States. Congress. House, 2008 Covers receipts and expenditures of appropriations and other funds Ward's World Motor Vehicle Data 2008 ,2008 **\$20 Per Gallon** Christopher Steiner, 2009-07-15 An extraordinarily insightful and thought provoking look at how our society and culture are going to change and change rapidly as the price of gasoline heating oil and all other everyday consumer products that are derived from oil continue to escalate Imagine an everyday world in which the price of gasoline and oil continues to go up and up and up Think about the immediate impact that would have on our lives Of course everybody already knows how about gasoline has affected our driving habits People can't wait to junk their gas guzzling SUVs for a new Prius But there are more not so obvious changes on the horizon that Chris Steiner tracks brilliantly in this provocative work Consider the following societal changes people who own homes in far off suburbs will soon realize that there's no longer any market for their houses reason nobody wants to live too far away because it's too expensive to commute to work Telecommuting will begin to expand rapidly Trains will become the mode of national transportation as it used to be as the price of flying becomes prohibitive Families will begin to migrate southward as the price of heating northern homes in the winter is too pricey Cheap everyday items that are comprised of plastic will go away because of the rising price to produce them plastic is derived from oil And this is just the beginning of a huge and overwhelming domino effect that our way of life will undergo in the years to come Steiner an engineer by training before turning to journalism sees how this simple but constant rise in oil and gas prices will totally restructure our lifestyle But what may be surprising to readers is that all of these changes may not be negative but actually will usher in some new and very promising aspects of our society Steiner will probe how the liberation of technology and innovation triggered by climbing gas prices will change our lives The book may start as an alarmist's exercise but don't be misled The future will be exhilarating **The Car Book 2008** Jack Gillis, Amy Curran, David Iberkleid, Julia Redmon, 2008
