*Summary of Supplemental Type Certificates* United States. Federal Aviation Administration, *Summary of Supplemental Type Certificates*, 1995 [Europe in the Global Space Economy](#) Patrizia Caraveo, Clelia Iacomino, 2023-08-28

This book analyzes the policies and space economy programs of major space faring nations and explores whether the present institutional set up in Europe is adequate to address the challenges. At the core of the discussion are the relative roles of governments and markets in a highly dynamic panorama that involves advancements in science modifications in technology and organization and the introduction of new rules of behavior. After a close examination of the history of development of the space economy and the shift from the centralized model to deregulation and the opening up of space activities to commercial companies a wide ranging overview of global space governance is provided. National and regional perspectives are discussed and the current role of commercial actors in the global space system is elucidated. The various challenges faced by Europe are then examined including the threat posed by institutional and market fragmentation to the emergence of European companies able to compete with companies of nations such as the USA. The final part of the book analyzes proposals for reforming of the space system in Europe and offers a vision for future European space policy.

## **The Political Economy of the Space Age** Andrea Sommariva, 2018-05-15

This book provides answers to the questions of why human kind should go into space and on the relative roles of governments and markets in the evolution of the space economy. It adopts an interdisciplinary approach to answer those questions. Science and technology define the boundaries of what is possible. The realization of the possible depends on economic institutional and political factors. The book thus draws from many different academic areas such as physical science, astronomy, astronautics, political science, economics, sociology, cultural studies and history. In the literature the space economy has been analyzed using different approaches from science and technology to the effects of public expenditures on economic growth and to medium term effects on productivity and growth. This book brings all these aspects together following the evolutionary theory of economic change. It studies processes that transform the economy through the interactions among diverse economic agents, governments and the extra systemic environment in which governments operate. Its historical part helps to better understand motivations and constraints technical, political and economical that shaped the growth of the space economy. In the medium term global issues such as population changes, critical or limited natural resources and environmental damages and technological innovations are the main drivers for the evolution of the space economy beyond Earth orbit. In universities this book can be used as a reference by historians of astronautics for researchers in the field of astronautics, international political economy and legal issues related to the space economy. In think tanks and public institutions both national and international this book provides an input to the ongoing debate on the collaboration among space agencies and the role of private companies in the development of the space economy. Finally this book will help the educated general public to orient himself in the forest of stimuli news and

solicitations to which he is daily subjected by the media television and radio and to react in less passive ways to those stimuli

**From Chanson de Geste to Epic Chronicle** Gérard Gouiran, 2020-03-25 In this collection of essays Gérard Gouiran one of the world's leading and much loved scholars of medieval Occitan literature examines this literature from a primarily historical perspective. Through texts offering hitherto unexplored insights into the history and culture of medieval Europe he studies topics such as the representation of alterity through female figures and Saracens in opposition to the ideal of the Christian knight the ways in which the narrating of history can become resistance and propaganda discourse in the clash between the Catholic Church and the French on the one hand and the Cathar heretics and the people of Occitania on the other. Questions of intertextuality and intercultural relations cultural representations fashioning the West in contact with the East and Christian dissidence in the twelfth and thirteenth centuries. Written in an approachable style the book will be of historical literary and philological interest to scholars and students as well as any reader curious about this hitherto little known Occitan literature.
