

# The Supply Chain Journey Series: Candles

Candles usually contain 60 percent paraffin, 35 percent stearic acid, and 5 percent beeswax. When mixing the waxes together, many manufacturers also add scent extracts

**FUN FACT:** Bayberry wax is derived from the fruit of the bayberry bush and has a distinctive aroma making it especially popular for use at Christmas.

1

1

Cotton or linen wicks are braided and treated with chemicals so they can bend at a 90 degree angle when burning. Wax is heated and melted into a clear, near-liquid state in huge metal kettles. Lastly, the wax is cooled and poured into a molding table so it can work its way into each mold carefully.

**FUN FACT:** An alternate method uses extrusion, a process in which crushed paraffin wax is forced through a heated steel die under extreme pressure.

As with anything that is flammable, testing the quality of these candles is vital before they can be sold and shipped.

**FUN FACT:** Animal or vegetable fats were used for the first candles. As candle-making technology progressed, beeswax became widely used.

4

3

With these candles finally on shelves all over the world, all that's left is picking out your favorite one and letting the hard work and beautiful scent fill your home

**FUN FACT:** The global Candle Market was valued USD 6.8 Billion in 2021 and is all set to surpass USD 9.9 Billion by 2028.

5

After the candles are approved as high quality, manufacturers can then sell them to vendors, suppliers, and massive retailers to be shipped all around the globe. The shipping process for candles must be fast as weather conditions can melt or shrink candles and damage them.

**FUN FACT:** Large-scale manufacture of candles became a reality only after 1834, when Joseph Morgan introduced the first mass-production candle-making machine.

*Step-by-step Spinning & Dyeing* Eunice Svinicki, 1974    *Scientific American*, 1895    *Education*, 1973    **Index to Handicraft Books, 1974-1984** Carnegie Library of Pittsburgh. Science and Technology Department, 1986

Handicrafts and do it yourself projects have always been a library's most popular and heavily requested subject. And for more than a decade a definitive index to handicraft books has not been published. To fill this gap the Science and Technology Department at Carnegie Library of Pittsburgh has compiled the **Index to Handicraft Books** listing more than 900 books and over 12,400 subject entries covering books published from 1974 to 1984. The **Index to Handicraft Books** is an essential reference tool for librarians who want to help someone find instructions for a varied range of do it yourself projects providing quick access to craft projects in books more recent than previous handicraft index books have listed. Each entry in the index consists of a subject heading, the name of the project as listed in the book, the author and title of the book and the page numbers on which the project can be found. The author and title correspond to those in the List of Works Cited section which gives full bibliographic information in order to help librarians find the book on their shelves or obtain the book through inter library loan. Because this index developed from a card file index of craft books acquired by Carnegie Library since 1974 the list concentrates mainly on medium priced books that most libraries buy.

*Candlemaking for Fun & Profit* Michelle Espino, 2000 Provides information on the basics of candlemaking and how to turn this craft into a profitable home based business.
