The Intriguing World Of Modern Management:

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1978 **Routledge Handbook on Business and Management in the Middle East** Yusuf Sidani, 2024-07-31 This Handbook provides thorough insights into crucial topics that have attracted scholarly and practitioner interest in business and management in the Middle Eastern region. The chapters of this Handbook open the window on the key areas of discussion in the field over the past few decades including organizational behavior, leadership, business culture, business ethics, human resources, business strategy, entrepreneurship, finance, and accounting. It starts with identifying five key themes emerging from the variety of topics, locations, and questions addressed by the various authors who contributed to this volume. The remaining 30 chapters tackle various topics of interest to the research and the practitioner: institutional contexts for doing business in the region; issues of leadership, ethics, and organizational behavior; the role of women in leadership; and some of the obstacles facing aspirant women leaders; people management and human resources issues in the Middle East; marketing in the Middle East; and strategy and entrepreneurship in the Middle East. The book closes with a reflection on management research in non-Western societies and describes some methodological challenges and propositions. The Handbook is designed for academics, students, and practitioners covering areas of relevance across business activities, functions, and locations in the Middle East. It is to be used as a reference for scholars doing business research or teaching and for practitioners involved in business activities in the region.

Cultural Influences on the Process of Strategic Management Andreas Michael Schühly, 2022-01-01 This unique book is positioned at the crossroads of strategic management and international business. Based on an in-depth literature review, the author empirically assesses the widely shared implicit assumption that strategic management processes can be globally applied in a standardized, i.e., culture-free manner. So far, a variety of tools have also been recommended but without incorporating cultural differences. As many organizations observe that this ethnocentric view is more an illusion than reality, strategic management research has started to focus on the cultural sensitivity of its theories, tools, and processes to provide practitioners in a multicultural setting with adequate know-how and tools. To foster long-term decision making despite uncertainty, scenario planning is frequently applied by practitioners. Up until today, scenario planning has, however, gained little attention from the academic community. Through this book, the author presents a newly developed framework for strategic management that combines the cultural value scale to test the cultural sensitivity of the long-term planning tool called scenario planning. The different process steps of scenario planning have been individually examined for their sensitivity toward the cultural dimensions of uncertainty avoidance and long-term orientation. The investigation is based on a unique global set of management consultants working for a leading professional service firm. The results of this research show the cultural sensitivity of scenario planning with different degrees of the process steps and the tested cultural dimensions.
