Children of the Japanese State Roger Goodman, 2000 In Japan today over 30 000 children are in the care of the state because their parents or guardians cannot will not or are not considered competent to look after them Drawing on his long term fieldwork in an institution for such children Roger Goodman describes what happens to them in a country that has no professional social workers and little tradition of adopting or fostering children in need of care and explains how in the 1990s the convergence of several factors in particular Japan's rapidly declining birth rate its signing of the UN Convention on the Rights of the Child and its discovery of child abuse led to a new role for child protection institutions which had otherwise scarcely changed over the past 50 years In the process he provides the first full account in English of the development and delivery of child welfare in the world's second largest economy

Intercultural Families and Schooling in Japan: Experiences, Issues, and Challenges, 2020-09-01 The purpose of this book is to show how research on families can be used to offer inspiration suggestions and guidance to intercultural families choosing to school their children in the regular Japanese school system Each chapter is written by a parent or parents who are themselves researchers and thus bring their skills to the task of writing about issues which have affected their families and are likely to affect other families in similar ways There are also suggestions for other non Japanese parents coping with similar issues The book is divided into three sections The first Finding our own way deals with children's and parents' struggles with identity and inclusion in Japanese schools and society The second Dealing with the Japanese school system offers narratives and advice on such topics as coping with homework and dealing with more than one school system as well as what government accredited Japanese overseas schools have to offer The third section Coping with challenges examines the experiences of families where children are different because they have physical or intellectual challenges or

live with foster or adoptive families The book concludes with a narrative about a family who made the decision to remove their children from the Japanese system entirely and send them abroad for schooling The authors of the chapters in this book are all current or former university faculty living in different areas of Japan Some who live in highly populated urban areas have had ample opportunities to locate educational options for their children while others living in rural communities have had to struggle to advocate for their children s inclusion in mainstream classes Their stories are all compelling and their advice is certain to be helpful to those planning to or already raising children in Japan This book will also be of value to researchers and educators particularly those with an interest in bilingualism intercultural families and cross cultural issues along with anyone wishing to learn more about contemporary Japanese society *Education and Training for American Competitiveness* United States.
