Ruderman, 1988 In describing the career of Abraham Yagel a Jewish physician kabbalist and naturalist who lived in northern Italy from 1553 to about 1623 David Ruderman observes the remarkable interplay between early modern scientific thought and religious and occult traditions from a wholly new perspective that of Jewish intellectual life Whether he was writing about astronomical discoveries demons marvelous creatures and prodigies of nature the uses of magic or reincarnation Yagel made a consistent effort to integrate empirical study of nature with kabbalistic and rabbinic learning Yagel s several interests were united in his belief in the interconnectedness of all thing a belief shared by many Renaissance thinkers that turns natural phenomena into signatures of the divine unity of all things Ruderman argues that Yagel and his coreligionists were predisposed to this prevalent view because of occult strains in traditional Jewish thought He also suggests that underlying Yagel s passion for integrating and correlating all knowledge was a powerful psychological need to gain cultural respect and acceptance for himself and for his

entire community especially in a period of increased anti Semitic agitation in Italy Yagel proposed a bold new agenda for Jewish culture that underscored the religious value of the study of nature reformulated kabbalist traditions in the language of scientific discourse so as to promote them as the highest form of human knowledge and advocated the legitimate role of the magical arts as the ultimate expression of human creativity in Judaism This portrait of Yagel and his intellectual world will well serve all students of late Renaissance and early modern Europe Kabbalah Magic in 90 Minutes M Muzamal Naveed,2019-11-05 Kabbalah it is very difficult and to some extent even paradoxical doctrine is very different from the concept of thinking of those ideas which are peculiar to thinking of the majority of Europeans On the other hand the inherent Kabbalah mystery incompleteness and symbolic imagery pronounced mysticism plaque were perhaps the most intriguing its qualities that attracted thereto plurality thinkers prone to the occult However the important thing they all saw in Kabbalah refraction characteristic of western occult ideas and propositions that all the great diversity of the phenomena of the universe young and old is a certain unity that all things and phenomena are parts ordered whole that the universe itself and all the hidden relationships between phenomena which at first glance seem to be chaotic and did not related to each other in fact control the mysterious laws that letters and numbers are full of meaning important key to understanding the laws of the universe that inspiration and imagination is much faster and more reliable can lead to the attainment of the ultimate truth than the proverbial common sense that man is both God and the Universe in miniature and finally the most important thing that there is a spiritual path going that people can free themselves from the purely human limitations and therefore to become a superman and understand God Kabbalah of course not the only doctrine setting out these and similar ideas they can be found in the system of the Tarot Despite the fact that the Kabbalists of the past centuries people were purely religious and perform religious commandments and ceremonies this however did not prevent the fact that Kabbalah eventually gained many of the features and properties of magic Abraham Abulafia one of the greatest Kabbalists and mystics of the XIII century was convinced that the Kabbalah a very effective means to achieve the magical purposes and therefore warned fellow of errors slipping into magic However the Kabbalistic doctrine of climbing opportunities from lowest to highest and the reunification of the earthly and the heavenly is a very valuable tool for the mystic the aspirant for bliss in communion with God and for the magician who wants to subjugate all the spiritual and physical strength and sees itself as the Person of God capable to understand the supreme art of magic In this sense of great interest is a special aspect of the teachings the so called practical Kabbalah is based on the belief that with the help of special rituals prayers and internal volitional acts a person can actively intervene in the history of the process eg zoom Messiah for each stimulation from below from the man always corresponds to the arousal from above from God The Complete Book of Spells, Ceremonies, and Magic Migene González-Wippler,1988 Theory What Is Magic The Evolution of Magic The Gods The Elements of Magic Initiation and Adepthood Types of Magic White versus Black Techniques of Magic The Four Elements The Kabbalah and Its Magical

Coudert,2023-08-14 If he had lived among the Greeks he would now be numbered among the stars So wrote Gottfried Wilhelm Leibniz in his epitaph for Francis Mercury van Helmont Leibniz was not the only contemporary to admire and respect van Helmont but although famous in his own day he has been virtually ignored by modern historians Yet his views influenced Leibniz contributed to the development of modern science and fostered the kind of ecumenicalism that made the

concept of toleration conceivable The progressive nature of van Helmont's thought was based on his deep commitment to the esoteric doctrines of the Lurianic Kabbalah With his friend Christian Knorr von Rosenroth van Helmont edited the *Kabbala Denudata* 1677 1684 the largest collection of Lurianic Kabbalistic texts available to Christians up to that time Because the subject matter of this work appears so difficult and arcane it has never been appreciated as a significant text for understanding the emergence of modern thought However one can find in it the basis for the faith in science the belief in progress and the pluralism characteristic of later western thought The Lurianic Kabbalah thus deserves a place it has never received in histories of western scientific and cultural developments Although van Helmont's efforts contributed to the development of religious toleration his experience as a prisoner of the Inquisition accused of Judaising reveals the problematic relations between Christians and Jews during the early modern period New Inquisitional documents relating to van Helmont's imprisonment will be discussed to illustrate the difficulties faced by anyone advocating philo-Semitism and toleration at the time
