Abdel-Motaal,2016-09-28 The thawing Antarctic continent offers living space and marine and mineral resources that were previously inaccessible This book discusses how revisiting the Antarctic Treaty System and dividing up the continent preemptively could spare the world serious conflict The Antarctic Treaty and related agreements collectively known as the Antarctic Treaty System ATS regulate the seventh continent which is the only continent without a native human population The main treaty within the ATS came into force in 1961 and suspended all territorial claims in Antarctica The Antarctic Environmental Protocol followed in 1998 and prohibited any minerals exploitation in the continent With this prohibition up for review in 2048 this book asks whether the Antarctic Treaty can continue to protect Antarctica Doaa Abdel Motaal an expert on environmental issues who has traveled through the Arctic and Antarctic explains that the international community must urgently turn its attention to examining how to divide up the thawing continent in a peaceful manner She discusses why the Antarctic Treaty is unlikely to be an adequate measure in the face of international competition for invaluable resources in the 21st century She argues that factors such as global warming the growth in climate refugees that the world is about to witness and the increasingly critical quest for energy resources will make the Antarctic continent a highly sought after objective Readers will come to appreciate that what has likely protected Antarctica so far was not the Antarctic Treaty but the continent's harsh climate and isolation With Antarctica potentially becoming habitable only a few decades from now revisiting the Antarctic Treaty in favor of an orderly division of the continent is likely to be the best plan for avoiding costly conflict      **North Pole Boarding House** Elsie McCall Gillis,Eugenie Louise Myles,1951 Author spent a year 1945-46 at Arctic Bay Baffin Island meteorological station where she kept house for the meteorological staff      **From North Pole to Equator: Studies of Wild Life and Scenes in Many Lands** Alfred Edmund Brehm,1896      **Survival and Sacrifice in Mars Exploration** Erik Seedhouse,2015-03-26 With current technology a voyage to Mars and back will take three years That's a lot of time for things to go wrong But sooner or later a commercial enterprise will commit itself to sending humans to Mars How will the astronauts survive Some things to consider are with current technology a voyage to Mars and back will take three years That's a lot of time for things to go wrong But sooner or later a commercial enterprise will commit itself to sending humans to Mars How will the astronauts survive Some things to consider are Who decides what medical resources are used for whom Who decides what medical resources are used for whom What is the relative weight of mission success and the health of the crew What is the relative weight of mission success and the health of the crew Do we allow
