Henry James

The Ivory Tower:

The Ivory Tower Henry James, 1917 In 1914 Henry James began work on a major novel about the immense new fortunes of America's Gilded Age. After an absence of more than twenty years, James had returned for a visit to his native country, what he found there filled him with profound dismay. In *The Ivory Tower*, his last book, the characteristic pattern underlying so much of his fiction in which American innocence is transformed by its encounter with European experience receives a new twist: raised abroad, the hero comes home to America to confront as James puts it, the black and merciless things that are behind the great possessions. James died in 1916 with the first three books of *The Ivory Tower* completed. He also left behind a treatment in which he charted the further progress of his story. This fascinating scenario, one of only two to survive among James's papers, is also published here together with a striking critical essay by Ezra Pound. Graduate schools have faced attrition rates of approximately 50 percent for the past 40 years. They have tried to address the problem by focusing on student characteristics and by assuming that if they could make better, more informed admissions decisions, attrition rates would drop. Yet high attrition rates persist and may in fact be increasing. *Leaving the Ivory Tower* thus turns the issue around and asks what is wrong with the structure and process of graduate education. Based on hard evidence drawn from a survey of 816 completers and noncompleters and on interviews with noncompleters, high and low Ph.D. productive faculty, and Directors of Graduate study, this book locates the root cause of attrition in the social structure and cultural organization of graduate education.
