Pritchard,1996 The public outcry for a return to moral education in our schools has raised more dust than it s dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truthtelling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education

**Straight to the Point** Julie Leibrich,1993

Based on interviews with randomly selected former offenders this book takes a fresh look at the course and nature of crime It cuts across theorising trying to understand what people actually experience why they do what they do and to get a picture of successful change As the Justice Department s Centennial Fellow Dr Leibrich tracked down fifty offenders who had been sentenced to supervision in 1987 and not reoffended three years later She asked them why not The people who participated in the interviews did so because they wanted to and their stories make this a moving piece of research The author soon found that going straight was curved that the people she interviewed did not fall into such neat categories as straight and crooked Her methodology which she describes in detail in the appendices needed to grapple with the many subtleties of her material and drew on different kinds of research strategies utilising their strengths In an exciting account of her approach to problem

solving on the basis of trial and error and intuition the reader gains insight into the personal experience of the research process the pitfalls and highlights the frustration and anxiety of data collection Will I find Trinity Is the guy I'm going to meet really okay Do I include people who have reoffended Does my write up reflect people's real experience The result this book is tight and rigorous in its analysis but does justice to the richness and warmth of the data valuing the words and actions of the people who participated in the study
