# The Healthy House

**Nick Baker, Koen Steemers**

## **The Healthy House:**

*Healthy Homes* Nick Baker, Koen Steemers, 2019-10-18 It is widely acknowledged that there is an urgent need to transform our housing stock to a better energy performance level. However, improving energy performance should not result in a negative impact on the health, wellbeing, and the comfort of building occupants. There are many energy neutral features that can be incorporated at small or zero cost which have a positive effect on wellbeing. This book aims to outline and discuss these aspects of building design. The issue of health and wellbeing has already entered into design advice for the workplace where productivity and absenteeism are often used as indicators. This book concentrates on residential buildings, notably mass housing and affordable strategies for which new, more socially and health-oriented indicators are being developed. Provides practical design guidance based on scientific evidence. Explores both physical and psychological wellbeing. Focuses on the home and immediate domestic environment. Structured in an accessible way for architects and designers. **Healthy Housing** Ray Ranson, 2002-11-01 The objective of this book is to encourage administrations to formulate a sound housing policy to solve basic health-related housing problems and to meet WHO's objective of healthful housing for all by the year 2000. The principles of healthy housing have universal applicability as most countries of the developed world have areas of slum or otherwise insanitary housing. It is hoped that this guide will be used extensively as a reference to basic health requirements for new housing and human settlements and as a guide for assessing the hygienic quality of existing housing. The book would sit well alongside inter-professional and community education programmes. **Richard Neutra and the Making of the Lovell Health House, 1925-35** Edward Dimendberg, 2025-09-02 This absorbing volume reveals the impact of the Lovell Health House from its inspiration through its construction to its impact. This book tells the story of the Lovell Health House designed and built by Austrian-American architect Richard Neutra 1892-1970. Perched on a steep hillside with panoramic views of Los Angeles, the home pioneered the use of concrete and steel, radically advanced the ideals of hygienic, carefree, and open-air living, and explored new relationships between space, structure, the natural world, and physical and psychological well-being. It was widely documented and written about in leading architectural journals when it was erected, and these publications elevated the house to the status of an icon in the history of modernism and an essential work of the international modern movement. It also helped to launch the global career of one of the central figures of twentieth-century architecture. The book is framed with an introduction by Edward Dimendberg and includes new texts by Crosby Doe and Thomas Hines. At the heart of this project are six portfolios on the background, design, making, circulation, reception, and resonance of this seminal residence by curator and archivist Nicholas Olsberg. Featuring historical photography by Willard Morgan and contemporary photography by Grant Mumford, this volume will help bring Neutra's masterpiece to an entirely new audience. *Departments of Transportation, and Housing and Urban Development, and Related Agencies Appropriations for 2011, Part 3, 111-2 Hearings, \**, 2010 **Transactions** Charles Edward Shelly, 1892 **Happy Homes**
