The Guilty Environmentalist:

The Guilty Environmentalist Arthur O'Donnell, 2003 *The Guilty Environmentalist* is a collection of essays musings and political fantasies from award winning humorist and energy journalist Arthur O'Donnell Join the Guilty Environmentalist as he trips lightly through this exploration of the history and foibles of the electric utility industry from the very beginnings of the Age of Electricity to the aftermath of California's most recent energy crisis Selected from the best of the Bottom Lines columns carried in the nationally acclaimed California Energy Markets newsletter over the past decade *The Guilty Environmentalist* provides a unique and frequently hilarious perspective on a crucial industry that most people take for granted until the lights go out

Environmental Guilt and Shame Sarah E. Fredericks, 2021-06-09 Bloggers confessing that they waste food non governmental organizations naming corporations selling unsustainably harvested seafood and veterans apologizing to Native Americans at the Standing Rock Sioux Reservation for environmental and social devastation caused by the United States government all signal the existence of action oriented guilt and identity oriented shame about participation in environmental degradation *Environmental Guilt and Shame* demonstrates that these moral emotions are common among environmentally friendly segments of the United States but have received little attention from environmental ethicists though they can catalyze or hinder environmental action Concern about environmental guilt and shame among everyday environmentalists reveals the practical emotional ethical and existential issues raised by environmental guilt and shame and ethical insights about guilt shame responsibility agency and identity A typology of guilt and shame enables the development and evaluation of these ethical insights *Environmental Guilt and Shame* makes three major claims first individuals and collectives including the diffuse collectives that cause climate change can have identity agency and responsibility and thus guilt and shame Second some agents including collectives should feel guilt and or shame for environmental degradation if they hold environmental values and think that their actions shape and reveal their identity Third a number of conditions are required to conceptually existentially and practically deal with guilt and shame's effects on agents These conditions can be developed and maintained through rituals Existing rituals need more development to fully deal with individual and collective guilt and shame as well as the anthropogenic environmental degradation that may spark them

The Sociology of the Environment M. R. Redclift, Graham Woodgate, 1995 In *The Sociology of the Environment* Michael Redclift and Graham Woodgate have brought together a diverse collection of writings from within the human sciences These papers chart the progress which sociology has made in addressing the environment Although they are not all written by sociologists they do illuminate a number of largely unresolved issues for sociology which mark important departures for the discipline and which necessitate a radical rethink of inherited assumptions The readings are organized under a number of different themes ranging from the theoretical foundations of the discipline to post industrial Utopianism Other areas covered include Marxism and the environment neo Malthusianism and environmental determination biocentric theories radical ecology scientific

enquiry and the environment international perspective and social movement and the environment The editors conclude that sociology still has much to do in rising to the challenge of interpreting environmental change indicating that this must be done by forging relationships with other disciplines in which the contribution that sociology can make is underlined rather than lost *Environmentalism* Timothy O'Riordan, 1976 **Multinational Monitor**, 1996 *Classic Educational Ideas from Sumeria to America* Bernard Mehl, 1972 **Christian Social Action**, 1992 *The Ecologist*, 2007 Readings for Environmental Literacy Michael L. McKinney, Parri Shariff, 1996 *Environmental Law and the Values of Nature* Richard J. Finkmoore, 2010 This casebook provides students in introductory environmental law courses with the broad understanding necessary to practice in the field and a firm foundation for subsequent course work in specialized environmental subjects In addition to covering many standard topics such as NEPA and the Clean Water Act this book emphasizes natural resources law including water allocation species conservation and federal public land management Unlike many casebooks it also examines energy issues climate change sustainable development and the environmental movement This distinctive book uses the historical development of environmental and natural resources law as a helpful context within which to understand the modern law in these fields It also incorporates eight engaging case studies showing the application of environmental law in the real world The volume includes significant excerpts from the major environmental statutes so that it is not necessary to assign a statutory supplement Thought provoking readings from for example Lewis and Clark Marsh Muir Udall Wilkinson Sax Lazarus Rodgers Shabecoff Hays E O Wilson Leopold Reisner and Speth enhance student insight One theme of the casebook which promotes enthusiastic class discussion is that the environment possesses a wide range of values or characteristics of worth and that an appreciation of these values illuminates the objectives strengths and limitations of contemporary law Beacham's Guide to Environmental Issues & Sources Walton Beacham, 1993 *The Journal of Environmental Sciences*, 1977 **Perspectives on Science and Christian Faith**, 1995 **Environmental Finance**, 2004 Environmental Policy Donald T. Wells, 1996 One doesn't need to look far to see evidence of environmental abuse The message is clear Environmental protection is not a choice it is a necessity We must rectify misuses of the past atone for the mistakes of the present and ensure the well being of future generations In this timely volume Donald T Wells focuses on the sensitive issues surrounding environmental policy Exploring the ecological basis of life the author helps readers to separate fact from fiction to correctly interpret these facts and to determine their significance for human actions In addition Wells searches for ways to restore and sustain environmental quality *Environmental Science* William P. Cunningham, Barbara Woodworth Saigo, 1999 Introducing students to environmental science without any prerequisites this text has a strong global emphasis and recognizes that the world is a unified biosphere that doesn't adhere to artificial political boundaries Topics covered include the Greenhouse Effect the Clean Air Act and El Nino The New Ecologist, 1978 *Towards a Sustainable Russia*, 2007 **Tennessee Code Annotated** Tennessee, 1955 *Trashing the Economy*

Ron Arnold, Alan M. Gottlieb, 1994 They challenge environmentalism Eco group leaders polled by People magazine voted Ron and Alan the Number One Enemy of the Earth they'd like to see living next to a toxic waste dump Everybody is talking about them Time magazine said in the wise use movement its ideologues are Ron Arnold a former Sierra Clubber who did a philosophical backflip and Alan Gottlieb a longtime fundraiser for conservative causes The New York Times wrote Mr Gottlieb is the most successful fund raiser working to tap a growing movement of loggers ranchers miners oil drillers dirt bike riders and others who view big environmental groups as a threat to their livelihood and way of life The Washington Post wrote A former Sierra Club official Arnold says he still considers himself a strong conservationist But he accuses mainstream groups of exaggerating or even inventing environmental threats in order to advance narrow political goals that have little to do with safeguarding natural resources
