*The Handbook of Jungian Play Therapy with Children and Adolescents* Eric J. Green,2014-11-01 Demystifying Jungian play therapy for non Jungian therapists interested in enhancing their clinical repertoire Child and family psychotherapist Eric J Green draws on years of clinical experience to explain his original model of Jungian play therapy The empathic techniques he illuminates in The Handbook of Jungian Play Therapy with Children and Adolescents can effectively treat children who are traumatized by abuse natural disasters and other losses as well as children who have attention deficit and autism spectrum disorders The overarching goal of Green s Jungian play therapy model is to help children and adolescents become psychologically whole individuals Toward that end therapists encourage children to engage in sandplay spontaneous drawing

and other expressive arts Green demonstrates how therapists can create an atmosphere of warmth and psychological safety by observing the child's play without judgment and through the therapeutic relationship help children learn to regulate their impulses and regain emotional equilibrium. Designed for master's level and doctoral students as well as school counselors, play therapists and private practitioners the book covers the theoretical underpinnings of depth psychology while highlighting easy to understand case studies from Green's own practice to illustrate Jungian play therapy applications at work.

**Jungian Counseling and Play Therapy** Rachel McRoberts, 2024-09-12 Jungian Counseling and Play Therapy is both an introduction to Jung's theory and a practical guide to Jungian informed practice. Readers journey through the development of the mental health crisis of the digital age which Jung foresaw and are presented with solutions he suggested that are still being met with resistance despite compelling facts. This book not only advocates for a more widespread integration of Jungian ideas into clinical practice but also for greater acknowledgement of the integrity, creativity and intersecting identities of clients, professional counselors and play therapists. Integrating historical theory with contemporary research this book helps students to weave creative techniques into their online and in person clinical work. This is an ideal text for a psychodynamic theory or methods class or to support counseling students and supervisors becoming interested in or familiar with the work of Carl Jung.

**Sandplay and Storytelling** Barbara A. Turner, Kristin Unnsteinsdottir, 2012-12-31 Combining the fields of child psychology and child education this groundbreaking work explores how engaging children in Jungian sandplay therapy and imaginative storytelling can improve classroom performance and to increase intelligence scores. Written by child specialists it makes a solid argument for the necessary consideration of the unconscious and the inner world of the individual child in learning and advocates that curriculum design for children must include both imaginative therapeutic play and active attention to children's emotional needs. Educators, psychotherapists and concerned parents alike will find this book informative and useful.
