Strabo Geography S 15 16:

The History of the Peoples of the Eastern Desert Hans Barnard, Kim Duistermaat, 2012-12-31 The last quarter century has seen extensive research on the ports of the Red Sea coast of Egypt the road systems connecting them to the Nile and the mines and quarries in the region. Missing has been a systematic study of the peoples of the Eastern Desert the area between the Red Sea and the Nile Valley in whose territories these ports roads mines and quarries were located. The historical overview of the Eastern Desert in the shape of a roughly chronological narrative presented in this book fills that gap. The multidisciplinary perspective focuses on the long term history of the region. The extensive range of topics addressed includes specific historical periods natural resources nomadic survival strategies ancient textual data and the interaction between Christian hermits and their neighbors. The breadth of perspective does not sacrifice depth for all authors deal in some detail with the specifics of their subject matter. As a whole this collection provides an outline of the history and sociology of the Eastern Desert unparalleled in any language for its comprehensiveness. As such it will be the essential starting point for future research on the Eastern Desert. Includes a CD of eleven audio files with music of the Ababda Nomads and six short videos of Ababda culture.

New Approaches to Ancient Material Culture in the Greek & Roman World

Catherine Cooper, 2020-11-16 New Approaches to Ancient Material Culture in the Greek Roman World is about Classical Archaeology at its broadest and is important reading to all Classicists. As part of a recent movement to highlight the rich diversity of the subject it overcomes traditional disciplinary boundaries to show the variety of current approaches to the study of Classical Antiquity from the Late Bronze Age to the Late Antique period. The multi disciplinary papers deal with archaeology and art history museum objects and fieldwork data ancient texts and material culture archaeological theory and historiography and technical and literary analysis. The international contributors discuss a selection of methodologies currently used to study ancient material and illustrate their relevance through case studies which span the Greek and Roman world.

Empire of the Black Sea Duane W. Roller, 2020 What is commonly called the kingdom of Pontos flourished for over two hundred years in the coastal regions of the Black Sea. At its peak in the early first century BC it included much of the southern eastern and northern littoral becoming one of the most important Hellenistic dynasties not founded by a successor of Alexander the Great. It also posed one of the greatest challenges to Roman imperial expansion in the east. Not until 63 BC after many violent clashes was Rome able to subjugate the kingdom and its last charismatic ruler Mithridates VI. This book provides a general history of this important kingdom from its mythic origins in Greek literature e.g. Jason and the Golden Fleece to its entanglements with the late republic of Rome. Roller discusses its rulers as well as the Romans and others who interacted with them and opposed them. He addresses social and cultural issues including the attitude of the traditional Greek states and other eastern kingdoms economic issues such as depopulation and land exhaustion and especially in the latter years of the dynasty the changing and indeed endless internal problems in Rome itself that would

come to drive or even overpower events in the field Previous histories of this era are varied in their focus and quality
Needless to say much of the interest has been directed to the final and most famous member of the dynasty Mithridates VI
120 63 BC this book explores the entire kingdom and its rich history Empire of the Black Sea is an engaging and accessible
